
SLIDE 1 — COVER

On-slide text:

PRESENTATION

Launching to

MINISTRY OF TRIBAL AFFAIRS, GOVERNMENT OF INDIA

FROM TRIBAL HERITAGE TO FUTURE LEADERSHIP

Empowering Tribal Communities for Viksit Bharat 2047

by — Degree 360 Solutions Pvt. Ltd.

Submitted in response to GeM Bid No. GEM/2026/B/7541452

Technical Presentation — Clauses 4.2.5, 4.2.6, 4.2.7

Design/production note: Title in Cormorant Garamond (carried over from your previous cover treatment) for the campaign name; agency name and bid reference in a smaller, neutral sans-serif beneath, so the cover reads as Ministry-first, agency-second — consistent with how the Meeting Notice frames this as the Ministry's process, not the agency's pitch.

SLIDE 2 — OPENING STATEMENT

On-slide text:

WHERE HERITAGE MEETS HORIZON.

Launching a national narrative that connects tribal India's past to India's future —

FROM ANCESTRAL WISDOM AND CULTURAL IDENTITY
TO EDUCATION, ENTREPRENEURSHIP, DIGITAL INCLUSION,
AND SUSTAINABLE LIVELIHOODS.

A campaign built for Viksit Bharat 2047.

Expanded context (for footer or speaker note):

This line is a direct echo of the RfP's own theme language at Annexure-I — "connect the rich legacy of tribal heritage, ancestral wisdom, cultural identity, and ecological knowledge with contemporary opportunities in education, skill development, entrepreneurship, digital inclusion, and sustainable livelihoods." Opening the deck by mirroring the Ministry's own

brief language (rather than substituting our own phrasing) signals from slide two that this submission was built specifically for this brief — not adapted from a template.

SLIDE 3 — ABOUT US

On-slide text:

ABOUT US

We deal in Print Media, Social Media, VR/AR, App Development, Outdoor Media, Exhibitions, Virtual Tours, Electronic Media, PR, Film Production, Events & Promotions, Marketing Strategy.

Our Accreditations:

DAVP · INS · NFDC · BECIL · The Advertising Council of India

Expanded body copy (additional supporting line for slide or notes):

Degree 360 Solutions Pvt. Ltd. operates across the full government communication stack — from concept and creative production to media buying, on-ground activation, and measurement — built specifically to service the compliance, approval, and accountability standards that government retainerships require.

Our accreditation with DAVP, INS, NFDC, BECIL, and The Advertising Council of India reflects sustained, verified work within the government and public communication ecosystem, not occasional or first-time engagement with it.

SLIDE 4 — OUR ASSOCIATIONS

On-slide text:

OUR ASSOCIATIONS

[Logo grid — Department of Consumer Affairs, KVIC, Ministry of Law & Justice, DFCCIL, Greater Noida Industrial Development Authority, and other past government/PSU clients, as in the previous deck]

Expanded framing line (header above grid):

A working record across ministries, departments, and public sector organisations — proof of fluency with government processes, not just creative output.

Speaker note: Keep this slide visual-led with minimal text; the logo grid itself is the argument. If the Ministry wants specifics, the next section (Past Work, Clause 4.2.5) carries the detail.

SLIDE 5 — PART 1 DIVIDER

On-slide text:

PART 1

A COMMUNICATION STRATEGY FOR
FROM TRIBAL HERITAGE TO FUTURE LEADERSHIP

Empowering Tribal Communities for Viksit Bharat 2047

Design note: Section dividers in your original deck were minimal — large type, no body copy, full-bleed background. Keep this consistent; the divider's job is pacing, not information.

SLIDE 6 — THE OPENING TRUTH

On-slide text:

THE OPENING TRUTH

India's tribal communities are not waiting at the doorstep of Viksit Bharat 2047.

They are already inside it — as students, entrepreneurs, artisans, athletes, and knowledge-holders shaping the nation's path.

Yet the country largely sees them through yesterday's lens.

That is not a failure of tribal communities.

That is a failure of communication.

This strategy exists to fix that — for this campaign, and for every campaign that follows.

Expanded rationale (notes, not on-slide):

This slide deliberately mirrors the structure of your previous deck's "Opening Truth" slide ("India is not merely supported by its Janjatiya communities. It is shaped, sustained, and defined by them...") — short declarative sentences, a clear villain (communication, not policy, not the community), and a clean handoff into "this strategy exists to fix that." The

rhetoical device is the same; the content is rebuilt to match "Future Leadership" rather than the previous "Pride that Defines India" framing — leadership is now the explicit destination, not just pride as an end state.

SLIDE 7 — THE COMMUNICATION PROBLEM

On-slide text:

THE STORY HAS BEEN TOLD INCOMPLETE.

THE COMMUNICATION PROBLEM:

For years, tribal India has been communicated as a story of need — schemes, support, upliftment. The tone has been one of providing for. The imagery has been one of waiting to arrive.

What's been missing is the other half of the story: tribal India as a story of contribution — heritage feeding innovation, culture feeding economy, wisdom feeding policy.

This campaign tells both halves — heritage and leadership — as one continuous story, not two separate chapters.

This is not a policy problem. This is a communication problem. And communication problems have communication solutions.

Expanded rationale (notes):

Your previous deck named the communication problem with a number ("104 million citizens... perceived as recipients, not contributors"). I've kept that diagnostic structure but removed the explicit population statistic from this particular slide so it doesn't pre-empt slide 11 ("Why This Matters: The Numbers"), where it lands with more weight as a standalone beat. The closing line — "communication problems have communication solutions" — is carried over verbatim in spirit because it's a strong, quotable closing device that a Committee member is likely to remember.

SLIDE 8 — THE STRATEGIC REFRAME

On-slide text:

FROM HERITAGE PRESERVED TO HERITAGE POWERING THE FUTURE.

Every creative and communication decision in this presentation flows from one reframe:

**Tribal heritage is not a chapter to be protected in the past tense.
It is the foundation Viksit Bharat 2047 is being built on, in the present tense.**

The shift: from "preserving where they came from" to "showcasing where they are taking India."

This is not spin. This is the truth, told in the tense it deserves.

Expanded rationale (notes):

This is the direct structural equivalent of your old deck's "Strategic Reframe" slide ("From Beneficiaries to Definers... This strategy reframes the narrative — from support to significance"). The grammatical device — past tense versus present tense — is new and specific to this RfP's exact theme wording ("From Tribal Heritage to Future Leadership"), since the new brief is explicitly about a temporal arc (heritage → leadership) rather than a status reframe (beneficiary → architect). Closing on "This is not spin. This is the truth..." echoes your previous deck's closing device for the same slide type, adapted to fit.

SLIDE 9 — THE STRATEGIC IDEA

On-slide text:

THE STRATEGIC IDEA

THEME: From Tribal Heritage to Future Leadership — Empowering Tribal Communities for Viksit Bharat 2047

THE DEVICE:

Every piece of content under this strategy begins with a thread of heritage — a craft, a forest, a language, a tradition — and follows that thread forward into a contemporary act of leadership: a student, an entrepreneur, an athlete, a digital innovator.

Not: "Here is where they came from."

But: "Here is where they are taking it."

Heritage is the root. Leadership is the branch. Both are the same tree.

Expanded rationale (notes):

Structurally identical to your old deck's "Strategic Idea" slide pairing (which had the "From Here, India Takes Shape" device plus a scope-of-work line). I've split that into two slides here — this one carries the creative device, and slide 10 carries the formal scope of work — so each does one job cleanly rather than crowding both onto a single slide as before. The tree metaphor ("root... branch... same tree") gives the Committee a single visual anchor they

can carry into the rest of the deck, useful since this device needs to recur in Part 3 (the campaign creatives).

SLIDE 10 — SCOPE OF THIS PRESENTATION

On-slide text:

SCOPE OF THIS PRESENTATION

This presentation responds to three evaluation clauses of the RfP:

Clause 4.2.5 — Evaluation of Past Work

Demonstrating production capability across reels, animation, TVC/promotional video, documentary, and print/outdoor/infographic formats.

(10 Marks)

Clause 4.2.6 — Campaign Design and Scratch Creatives

A full creative campaign built on the Ministry's assigned theme, with logo, tagline, and eight original deliverables.

(20 Marks)

Clause 4.2.7 — Social Media Management and Analysis

A SWOT assessment of the Ministry's current social media presence, a forward action plan, and a metrics framework.

(10 Marks)

Expanded rationale (notes):

Naming the clause numbers and marks explicitly on this slide is a deliberate departure from your old deck (which described scope thematically — "Social Media Management, Public Representation, Content Strategy..." — without referencing specific RfP clauses by number). Since this RfP comes with a published, numbered evaluation rubric (Annexure-II), naming the clauses directly signals to the Committee that the deck is structured to make their scoring easier — each section maps one-to-one to what they're marking against.

SLIDE 11 — WHY THIS MATTERS: THE NUMBERS

On-slide text:

WHY THIS MATTERS: THE NUMBERS

104 MILLION citizens
700+ tribal communities
22+ constitutional languages
Thousands of years of ecological and cultural knowledge

This is the scale of the story Viksit Bharat 2047 has been waiting to tell — and the scale this campaign is built to carry.

None of this is widely known. That is the communication gap this campaign closes.

Expanded rationale (notes):

This slide is a near-direct carry-over from your old deck's "Why This Matters: The Numbers" slide ("104 million reasons to communicate better... None of this is widely known. That is the communication gap this strategy closes."), since the underlying statistics (population, tribe count, languages) are factual and don't change based on campaign theme. Recommend designing this as a stat-led visual slide — four large numbers, minimal supporting text — rather than a paragraph slide, consistent with how your old deck treated equivalent "numbers" slides (e.g. "Identity: The Numbers," "Why This Matters: The Numbers").

SLIDE 12 — THE FOUR NARRATIVE PILLARS

On-slide text:

THE FOUR NARRATIVE PILLARS

Every creative, every post, every line of copy under this campaign maps to one of four pillars:

HERITAGE — OPPORTUNITY — CONTRIBUTION — LEADERSHIP

These are not separate campaign themes.

They are four faces of one truth: tribal India's past is actively building India's future.

Expanded rationale (notes):

Your old deck used four pillars too (Identity, Strength, Aspiration, Contribution), each with its own dedicated slide cluster (objective, evidence, voice). I've renamed and restructured them — Heritage, Opportunity, Contribution, Leadership — to map directly onto the new RfP theme's own four-part structure: "heritage, ancestral wisdom, cultural identity, and ecological knowledge" (→ Heritage) connecting to "education, skill development, entrepreneurship, digital inclusion, and sustainable livelihoods" (→ Opportunity), with the Ministry's schemes proving it (→ Contribution) and tribal citizens as the visible result (→

Leadership). This keeps the four-pillar device your old deck used successfully, while making each pillar traceable back to a specific phrase in the new brief.

SLIDE 13 — PILLAR 1: HERITAGE

On-slide text:

PILLAR 1: HERITAGE

The Communication Objective:

Establish tribal communities as custodians of India's oldest living knowledge systems — language, craft, ecological wisdom, and cultural identity.

The Core Message:

This is not heritage to be displayed in a museum. This is the foundation Viksit Bharat is built on.

The Tone:

Proud. Declarative. Rooted in fact — not nostalgia.

What We Communicate:

700+ tribes. 22+ constitutional languages. Centuries of agricultural, ecological, and craft knowledge — actively practiced, not archived.

Expanded rationale (notes):

This slide follows the exact internal structure your old deck used for each pillar (Objective / Core Message / Tone / What We Communicate) — that four-part template worked well and gives the Committee a predictable rhythm across all four pillar slides, so I've kept it intact rather than redesigning it. The line "not nostalgia" is a deliberate guardrail: your old deck's Pillar 1 (Identity) included a "What We Never Say" list (e.g. "Despite challenges, tribal communities...") — I'd recommend carrying a version of that list onto this slide or the next, since it's one of the strongest tone-setting devices in the original deck and costs very little slide space.

SLIDE 14 — PILLAR 2: OPPORTUNITY

On-slide text:

PILLAR 2: OPPORTUNITY

The Communication Objective:

Show how education, skilling, digital access, and entrepreneurship are converting heritage into momentum — connecting EMRS, scholarships, PM JANMAN, and DAJGUA to real outcomes.

The Core Message:

Opportunity does not erase heritage. It builds on it.

The Tone:

Optimistic. Specific. Outcome-led — not announcement-led.

The Critical Shift:

Stop announcing schemes. Start showing what communities achieve with them.

Expanded rationale (notes):

The "Critical Shift" framing is carried over directly from your old deck's Pillar 3 (Aspiration), which had the same instinct: "Stop announcing schemes. Start celebrating what communities achieve with them." This is one of the most useful lines in the entire old deck because it gives the creative team (and the Committee) a concrete editorial rule, not just a mood. Recommend keeping this exact wording rhythm across the deck wherever a pillar slide needs a one-line operating principle.

SLIDE 15 — PILLAR 3: CONTRIBUTION**On-slide text:****PILLAR 3: CONTRIBUTION****The Communication Objective:**

Make visible the everyday economic, ecological, and cultural contributions tribal communities make to the nation — through Van Dhan Yojana, TRIFED, GI-tagged crafts, and forest stewardship.

The Core Message:

Tribal India is not catching up to Viksit Bharat. It is already building it.

The Tone:

Factual. Receipts-based. Quietly confident.

What We Communicate:

GI-tagged tribal crafts already in national and export markets. Forest area under tribal stewardship. Annual trade value generated through Van Dhan Yojana and TRIFED.

Expanded rationale (notes):

"Receipts-based" tone is carried over directly from your old deck's Pillar 4 (Contribution: "Factual. Proud. Receipts-based. No sentiment needed when the numbers speak.") — it's a strong, specific tonal instruction that distinguishes this pillar from the more emotive Heritage and Leadership pillars. For the live presentation, this slide is a strong candidate to pair with a real, sourced statistic (forest area %, TRIFED trade value) the way your old deck did at the bottom of equivalent slides (e.g. "India's tribal communities protect 28% of forest area... Source: Wildlife Institute of India / NTCA 2023") — recommend pulling current verified MoTA/TRIFED figures before finalising this slide so the claim is fully sourced and defensible if questioned live.

SLIDE 16 — PILLAR 4: LEADERSHIP**On-slide text:**

PILLAR 4: LEADERSHIP

The Communication Objective:

Spotlight tribal students, entrepreneurs, artisans, athletes, women leaders, and community institutions as the visible face of India's leadership pipeline.

The Core Message:

The next generation of India's leaders is already here — and they carry their heritage forward, not behind them.

The Tone:

Forward-facing. Aspirational. Personal.

What We Communicate:

Real names. Real communities. Real outcomes — an EMRS topper, a Van Dhan entrepreneur exporting nationally, an athlete on a national stage. The scheme is the supporting cast. The person is the story.

Expanded rationale (notes):

"The scheme is the supporting cast. The person is the story" is a direct adaptation of one of the strongest editorial rules in your old deck (Pillar 3, Aspiration: "The scheme is the supporting cast, never the hero"). This is the pillar that should feel the most different from the old deck's equivalent, since "Leadership" wasn't a named pillar last time — it's new to this brief, reflecting the RfP's explicit shift in framing from "Pride that Defines India" to "Future Leadership." Recommend this pillar gets the most real, named human examples of any of the four, since leadership is best proven through specific people, not abstractions.

SLIDE 17 — THE COMMUNICATION CHANNELS

On-slide text:

THE COMMUNICATION CHANNELS

This strategy operates across four connected channels, each carrying the same narrative in a different register:

SOCIAL MEDIA — daily, owned, visual storytelling

EARNED MEDIA — third-party credibility through press and broadcast

CAMPAIGN CREATIVES — the flagship multi-format campaign under Clause 4.2.6

COMMUNITY & SCHEME INTEGRATION — weaving PM JANMAN, DAJGUA, EMRS, Van Dhan, and TRIFED into one unified narrative

All four carry the same four pillars. None of them work in isolation.

Expanded rationale (notes):

Your old deck ran six channels in full depth (Social, Earned Media, Vernacular, Spokesperson, Content Publishing, Community Outreach) across roughly 12 slides. Since this section is now intentionally compressed to a strategic framing layer (not a scored deliverable), I've consolidated to four channels and one slide, explicitly pointing forward to where each channel actually gets built out in the rest of the deck — Social Media gets its full, scored treatment in Part 4 (Clause 4.2.7), and Campaign Creatives gets its full treatment in Part 3 (Clause 4.2.6). This slide's job is just to show the Committee the map before we walk it.

SLIDE 18 — FROM STRATEGY TO EXECUTION

On-slide text:

FROM STRATEGY TO EXECUTION

The remainder of this presentation translates this thinking into three concrete deliverables required by the RfP:

Our past work, demonstrating production capability (*Clause 4.2.5*)

A complete campaign built on the Ministry's theme (*Clause 4.2.6*)

A social media diagnosis and forward plan (*Clause 4.2.7*)

Every section ahead carries the same four pillars — Heritage, Opportunity, Contribution, Leadership.

Expanded rationale (notes):

This slide functions as a table-of-contents / bridge slide — a deliberate pacing beat before the deck moves from strategic framing (Part 1) into the three scored, evidence-based sections. Recommend keeping this visually simple (three numbered blocks, clause numbers and marks repeated from slide 10) so it reads as a quick orientation rather than new information — the Committee has already seen this structure once at slide 10, and seeing it again here, right before the content starts, reinforces it without feeling repetitive.

SLIDE 19 — PART 1 CLOSING / TRANSITION**On-slide text:**

ONE NARRATIVE. THREE DELIVERABLES.

Heritage that earns pride.

Opportunity that earns access.

Contribution that earns recognition.

Leadership that earns the future.

What follows is the proof of execution.

Expanded rationale (notes):

This is the closing line for Part 1, written to be quotable and memorable as a standalone statement — the kind of line a Committee member might write down or repeat back during discussion. It deliberately resolves all four pillars in a parallel four-line structure (Heritage/Opportunity/Contribution/Leadership, each paired with what it "earns"), giving the section a clean rhetorical close before the deck moves into Part 2 (Past Work). Recommend a clean transition — fade or cut directly into the Part 2 divider slide — without additional content between this and the next section.

I'll expand slides 20–51 (Clause 4.2.5 — Past Work) into full, in-depth slide copy, following the same approach: complete on-slide text plus expanded rationale notes tying each slide back to the RfP's exact evaluation language (Conceptualization / Overall Production Quality, scored out of 10 across five elements).

SLIDE 20 — PART 2 DIVIDER**On-slide text:**

PART 2

PAST WORK

Clause 4.2.5 — Evaluation of Past Work
(FY 2024–25 onwards)

Expanded rationale (notes):

Carrying the exact clause title and the FY qualifier from Annexure-II onto the divider itself (rather than just "Past Work") signals immediately that everything in this section is scoped to the Committee's actual evaluation window — work older than FY 2024–25 should not appear past this point, since the RfP is specific about the date range.

SLIDE 21 — SECTION INTRO

On-slide text:

WHY PAST WORK MATTERS

Strategy means nothing without proof of execution.

This section presents five categories of completed work — reel, animation, TVC/promotional video, documentary, and print/outdoor/infographic — each demonstrating the same standard we will bring to the Ministry of Tribal Affairs.

Every piece is evaluated on two counts:

How well it was conceived.

How well it was made.

Expanded rationale (notes):

This slide explicitly names the two evaluation parameters from Annexure-II (Conceptualization — 5 Marks, Overall Production Quality — 5 Marks) in plain language before a single piece of work is shown, so the Committee enters each subsequent element already primed to assess against those two specific lenses rather than a generic "is this good" impression. This mirrors how your old deck handled scope slides — naming the framework before the content that fills it.

SLIDE 22 — ELEMENT 1 DIVIDER

On-slide text:

ELEMENT 1

REEL OR SHORT VIDEO
(up to 30 seconds)

Expanded rationale (notes):

Keep divider slides for each element minimal and large-type only, consistent with your old deck's treatment of equivalent dividers (e.g. "REEL OR SHORT VIDEO," "FULL-PAGE PRINT CREATIVE / OUTDOOR CREATIVE / INFOGRAPHIC" as standalone title-only slides). This gives the Committee a clean visual marker every time the evaluation moves to a new scored element — useful for them when filling in a scoresheet against five separate items.

SLIDE 23 — REEL: CONTEXT SLIDE

On-slide text:

WHAT THIS ELEMENT DEMONSTRATES

Short-form video is the fastest-growing format for government outreach — built for mobile-first audiences, vernacular reach, and daily visibility on Instagram, YouTube Shorts, and Facebook Reels.

This reel demonstrates our ability to compress a complete human story — beginning, turn, and payoff — into 30 seconds without losing emotional weight.

[Embed: Reel sample — FY 2024–25 or later]

Expanded rationale (notes):

Framing the *why this format matters* before showing the actual reel gives non-specialist Committee members (who may not personally use Reels/Shorts) a quick rationale for why this format is being evaluated at all, rather than assuming shared context. Recommend a one-line caption under the embedded video naming the actual client/Ministry the original reel was made for, and the month/year, to substantiate the FY 2024–25 onwards requirement at a glance.

SLIDE 24 — REEL: CONCEPTUALIZATION NOTE

On-slide text:

CONCEPTUALIZATION

The idea: one real moment, told in real time, with no narration crutch — visuals and sound carry the story.

Built for platforms where attention is earned in the first two seconds, not given.

Why this concept works:

No voiceover means no translation barrier and no risk of tone mismatch. The story is carried entirely by what the viewer sees and hears in the moment — a stronger test of whether the visual idea itself is strong enough to hold attention.

Expanded rationale (notes):

This slide deliberately separates "the idea" from "why it works" as two distinct beats, since Conceptualization is explicitly one of the two scored parameters (5 of the 10 marks for this clause) — giving it a dedicated slide rather than folding it into the context slide makes it easier for a Committee member to locate and score specifically.

SLIDE 25 — REEL: PRODUCTION QUALITY NOTE

On-slide text:

PRODUCTION QUALITY

Shot on professional-grade equipment with colour grading, sound design, and platform-specific aspect ratios (9:16) for native feed performance.

Technical specifications:

4K source footage, graded for consistent skin tone and colour temperature across cuts. Sound mixed for mobile speaker playback first, headphone playback second — the reverse of cinema mixing priorities, and the correct priority for this format.

Expanded rationale (notes):

Naming the technical specifics (aspect ratio, resolution, mix priority) gives this slide concrete, checkable claims rather than vague reassurance ("high quality production") — useful given that Overall Production Quality is the other half of this clause's scoring. Recommend this same level of technical specificity across all five elements' production quality slides, since the Committee is explicitly scoring "Overall Production Quality" as a named criterion, not just general impression.

SLIDE 26 — ELEMENT 2 DIVIDER

On-slide text:

ELEMENT 2

ANIMATION VIDEO WORK
(at least 30 seconds)

SLIDE 27 — ANIMATION: CONTEXT SLIDE

On-slide text:

WHAT THIS ELEMENT DEMONSTRATES

Animation lets government communication explain what live footage cannot — process, scale, and impact, in a single visual language, accessible across literacy levels, age groups, and regions.

[Embed: Animation sample — FY 2024–25 or later]

Expanded rationale (notes):

The phrase "accessible across literacy levels" is a deliberate callback to the kind of accessibility argument the RfP's own theme language cares about — reaching "remote and underserved regions." Recommend the actual animation sample chosen for this slide be one that explained a scheme or process (not just a brand film), since that's the strongest possible proof point for this particular framing.

SLIDE 28 — ANIMATION: CONCEPTUALIZATION NOTE

On-slide text:

CONCEPTUALIZATION

The idea: turn a scheme or process into a visual metaphor that a viewer understands without reading a single word — built for low-literacy and multilingual outreach.

The test we apply:

If the animation only makes sense with the sound on and the captions read aloud, the visual metaphor has failed. A strong government-explainer animation should communicate its core idea even muted.

Expanded rationale (notes):

The "test we apply" framing turns an abstract claim about conceptual strength into something the Committee could theoretically verify themselves by muting the video — a small device that builds credibility because it invites scrutiny rather than just asserting quality.

SLIDE 29 — ANIMATION: PRODUCTION QUALITY NOTE

On-slide text:

PRODUCTION QUALITY

Custom illustration, motion graphics, and an original score — built in-house, not templated.

Every frame matches the visual identity of the sponsoring department.

What "in-house, not templated" means in practice:

No stock animation libraries, no generic explainer-video templates. Character design, background art, and motion timing built specifically for this brief, frame by frame.

Expanded rationale (notes):

"Not templated" is an important claim to make explicit here because animation is one of the categories most commonly produced using stock/template libraries in lower-cost agency work — directly stating that this wasn't templated, and explaining what that means in practice, pre-empts an obvious quality concern a Committee evaluating "Overall Production Quality" might otherwise have.

SLIDE 30 — ELEMENT 3 DIVIDER

On-slide text:

ELEMENT 3

TVC SHOWREEL / ONLINE PROMOTIONAL VIDEO
(up to 2 minutes)

SLIDE 31 — TVC: CONTEXT SLIDE

On-slide text:

WHAT THIS ELEMENT DEMONSTRATES

This showreel demonstrates our range across formats and clients — the breadth of craft we bring to a long-term retainership, not a single campaign.

[Embed: TVC/Showreel sample — FY 2024–25 or later]

Expanded rationale (notes):

This is the one element in Clause 4.2.5 explicitly framed around *breadth* rather than depth on a single piece — appropriate, since a "showreel" by definition compiles multiple projects. Recommend the actual showreel used here include at least one government/public-sector piece and one commercial piece, so the range claim is visibly substantiated rather than asserted.

SLIDE 32 — TVC: CONCEPTUALIZATION NOTE

On-slide text:

CONCEPTUALIZATION

The idea: a fast-cut, high-energy compilation that proves consistency of quality across multiple briefs, sectors, and government clients — not a one-off success.

Why consistency is the concept, not the content:

A showreel's job is structural, not narrative — its concept is the editing logic that makes disparate projects feel like one continuous standard of work, not a single story being told.

Expanded rationale (notes):

This slide makes an important distinction explicit: for a showreel specifically, "conceptualization" doesn't mean a single creative idea (as it would for a reel or a print ad) — it means the curatorial and editorial logic behind which work was chosen and how it's sequenced. Naming this distinction helps the Committee apply the right mental model when scoring this particular element differently from the others.

SLIDE 33 — TVC: PRODUCTION QUALITY NOTE

On-slide text:

PRODUCTION QUALITY

Multi-camera shoots, professional voiceover direction, and broadcast-standard finishing — built to run across television, digital, and cinema placements without re-edit.

What "without re-edit" means:

Colour space, audio levels, and aspect ratio mastered to broadcast specification from the first cut — not adjusted after the fact for a lower originally-intended format.

Expanded rationale (notes):

"Without re-edit" is a meaningful production-quality claim specifically for a Ministry retainership context, since broadcast-ready masters save the client time and cost on every future placement — a small but concrete differentiator worth stating plainly rather than leaving implicit.

SLIDE 34 — ELEMENT 4 DIVIDER

On-slide text:

ELEMENT 4

DOCUMENTARY / VIDEO ON A MINISTRY, DEPARTMENT, OR GOVT. SCHEME
(more than 5 minutes)

SLIDE 35 — DOCUMENTARY: CONTEXT SLIDE

On-slide text:

WHAT THIS ELEMENT DEMONSTRATES

Long-form storytelling is where credibility is built — where a scheme stops being an announcement and becomes a documented, verifiable outcome.

[Embed: Documentary sample — FY 2024–25 or later]

Expanded rationale (notes):

This framing line directly echoes a core editorial principle from your old deck's communication strategy section ("Stop announcing schemes. Start celebrating what communities achieve with them") — applying that same principle here to justify *why* documentary as a format matters, not just what it is.

SLIDE 36 — DOCUMENTARY: CONCEPTUALIZATION NOTE

On-slide text:

CONCEPTUALIZATION

The idea: structure the film around real beneficiaries and real outcomes, in their own words, with the scheme as supporting context — never the headline.

The structural choice:

Open on the person's life before context is given. Let the viewer meet them as a person first, a beneficiary second. The scheme enters the story only once the person has already earned the viewer's attention.

Expanded rationale (notes):

This slide expands on the sequencing logic behind the documentary's structure — opening on person-before-policy — because *sequence* is itself a conceptual choice worth defending explicitly, not just a stylistic preference. This is the kind of detail likely to differentiate a strong Conceptualization score from an average one in the Committee's eyes.

SLIDE 37 — DOCUMENTARY: PRODUCTION QUALITY NOTE**On-slide text:****PRODUCTION QUALITY**

Field-shot across multiple locations, with synchronised sound, subtitle tracks for accessibility, and an edit pace built for sustained attention over five-plus minutes.

Why pacing is a production-quality decision:

A five-minute-plus film that holds attention requires deliberately varied shot length and rhythm — not a single visual tempo stretched past its natural length. Pacing was treated as a craft decision, not an afterthought of the edit.

Expanded rationale (notes):

Calling out pacing specifically as a production-quality consideration (rather than purely a conceptual one) is useful because long-form video is the one format in this clause where poor pacing is the single most common quality failure — explicitly addressing it here shows the Committee this was considered, not accidental.

SLIDE 38 — ELEMENT 5 DIVIDER**On-slide text:****ELEMENT 5**

FULL-PAGE PRINT CREATIVE / OUTDOOR CREATIVE / INFOGRAPHIC

SLIDE 39 — PRINT/OUTDOOR: CONTEXT SLIDE

On-slide text:

WHAT THIS ELEMENT DEMONSTRATES

Print and outdoor remain the formats of record for government communication — the version that appears in newspapers, at events, and on government premises.

[Embed: Print/Outdoor/Infographic sample — FY 2024–25 or later]

Expanded rationale (notes):

"Formats of record" is a deliberate phrase choice — it positions print and outdoor not as legacy or declining formats, but as the durable, citable, archival version of a campaign, which is the argument most likely to resonate with a government evaluation committee that itself works through formal documentation and records.

SLIDE 40 — PRINT/OUTDOOR: CONCEPTUALIZATION NOTE

On-slide text:

CONCEPTUALIZATION

The idea: one clear message, one clear visual hierarchy, readable in under five seconds — designed for a medium with no scroll and no replay.

The discipline this requires:

Every element competing for the headline, image, or call-to-action had to be cut until exactly one of each remained. Static media offers no second chance to clarify — the concept must be unambiguous on first look.

Expanded rationale (notes):

"No scroll and no replay" is a useful contrast point against the previous video-based elements, helping the Committee mentally reset their evaluation criteria as they move from motion-based formats to static ones — the constraints, and therefore what counts as strong conceptualization, are genuinely different.

SLIDE 41 — PRINT/OUTDOOR: PRODUCTION QUALITY NOTE

On-slide text:

PRODUCTION QUALITY

Print-ready resolution, accurate colour profiles for offset and outdoor print, and typography tested for legibility at both A4 and hoarding scale.

What this prevents:

Colour shift between screen preview and final print output, and type that reads cleanly on a laptop but blurs or disappears at hoarding distance — two of the most common, avoidable failures in government print and outdoor work.

Expanded rationale (notes):

Naming the specific failure modes being avoided (colour shift, scale-dependent legibility loss) gives this claim real substance — it shows awareness of where this category of work typically goes wrong, which is more convincing than a generic "high quality" assertion.

SLIDE 42 — CROSS-ELEMENT SUMMARY

On-slide text:

WHAT THESE FIVE ELEMENTS PROVE TOGETHER

Five formats. One consistent standard of conceptual clarity and production discipline — across short-form, animation, broadcast-length video, long-form documentary, and static creative.

This is the range a national-level retainership for the Ministry of Tribal Affairs requires.

Expanded rationale (notes):

This slide functions as a checkpoint before the deck moves into more reflective/process-oriented slides (43–48) — it closes the actual evidence-showing portion of Clause 4.2.5 cleanly, so the Committee has a clear sense that the five required elements have all now been shown before the deck moves into supporting context.

SLIDE 43 — EVALUATION SELF-CHECK: CONCEPTUALIZATION

On-slide text:

HOW WE APPROACH CONCEPTUALIZATION

Every piece begins with one question:

What is the single idea a viewer should remember after this ends?

If the idea cannot be stated in one sentence, the brief is not ready — and neither is the script.

Expanded rationale (notes):

This slide and the next (Production Quality) function as a kind of internal methodology statement, showing the Committee the actual editorial discipline behind all five elements just shown, rather than leaving the connection between "what we showed" and "how we think" implicit. This mirrors the instinct in your old deck's pillar slides, where a tone/method principle (e.g. "The Tone: Proud. Declarative. Never explanatory.") always accompanied the content itself.

SLIDE 44 — EVALUATION SELF-CHECK: PRODUCTION QUALITY

On-slide text:

HOW WE APPROACH PRODUCTION QUALITY

Production quality is not measured by budget.

It is measured by consistency: colour, sound, pacing, and finishing that hold up across every platform the content will live on.

Expanded rationale (notes):

"Not measured by budget" is a useful, slightly provocative framing for a government RfP context, where evaluators may sometimes (consciously or not) equate production value with spend. This line reframes the conversation toward consistency and craft discipline — qualities a smaller, more disciplined production can match or beat a larger-budget but less consistent one on.

SLIDE 45 — PAST WORK: CLIENT RANGE

On-slide text:

WORK ACROSS SECTORS

Our FY 2024–25 portfolio spans ministries, departments, and public sector organisations — proof of our ability to translate diverse government mandates into clear, audience-ready communication.

[Logo/client grid — reuse relevant entries from Associations slide]

Expanded rationale (notes):

This slide deliberately reuses logos from the earlier "Our Associations" slide (slide 4) rather than introducing new ones, both to avoid slide bloat and to reinforce that the Associations

claim made at the start of the deck is the same evidence base being used to support the Past Work clause — consistency across the deck, not two separate, disconnected credibility claims.

SLIDE 46 — PAST WORK: GOVERNMENT DOMAIN EXPERIENCE

On-slide text:

EXPERIENCE WITH GOVERNMENT COMMUNICATION SPECIFICALLY

Government communication carries constraints — accuracy, approvals, multilingual reach, and sensitivity — that commercial creative work does not.

Our past work reflects fluency with all of them.

Expanded rationale (notes):

This slide exists to address an implicit evaluation concern: a Committee scoring "past work" wants reassurance that the agency understands government-specific constraints (approval chains, factual accuracy obligations, sensitivity around community representation), not just that the agency can produce visually polished content in general. Naming these constraints explicitly shows self-awareness about what government work specifically demands.

SLIDE 47 — PAST WORK: PRODUCTION TEAM

On-slide text:

THE TEAM BEHIND THIS WORK

Each element shown was produced by an in-house team spanning scriptwriting, cinematography, animation, sound design, and post-production — not outsourced fragments stitched together.

Why this matters for a retainership:

A monthly retainership needs a team that can move quickly across formats without re-briefing a new vendor for every deliverable. An in-house, cross-disciplinary team is what makes that pace possible.

Expanded rationale (notes):

"Not outsourced fragments stitched together" directly addresses a known risk in agency retainerships — inconsistent quality when different elements of a single brief are subcontracted to different vendors with no unified creative direction. Stating this plainly

turns a structural fact about the agency (in-house team) into a direct answer to an unstated but real evaluation concern.

SLIDE 48 — PAST WORK: WHY THIS MATTERS FOR MOTA

On-slide text:

WHY THIS MATTERS FOR THE MINISTRY OF TRIBAL AFFAIRS

A monthly retainership demands consistency across formats, not a single high-quality showreel.

This section demonstrates that every format the RfP requires is already a proven part of our working capability.

Expanded rationale (notes):

This slide closes the loop explicitly back to the nature of the engagement being competed for (a *monthly retainership*, as stated in the Meeting Notice itself: "hiring of a Social Media and Public Relations (PR) Management Agency on a monthly retainership basis") — reminding the Committee that what they are scoring isn't a one-off campaign pitch, but evidence of sustained monthly delivery capability.

SLIDE 49 — PAST WORK: TRANSITION

On-slide text:

FROM PROOF OF CAPABILITY TO PROOF OF FIT

Having shown what we can produce, the next section shows how we would apply that capability to the Ministry's specific campaign theme for Viksit Bharat 2047.

Expanded rationale (notes):

This is a deliberate bridge slide separating "general capability" (Clause 4.2.5) from "specific application of that capability to this exact brief" (Clause 4.2.6) — important because these are scored as genuinely separate clauses with separate mark allocations (10 vs. 20), and the deck should make that separation legible, not blur the two sections together.

SLIDE 50 — ELEMENT RECAP TABLE

On-slide text:

PAST WORK: ELEMENT RECAP

Element	Evaluation Basis
i. Reel or Short (≤ 30 sec)	Conceptualization + Production Quality
ii. Animation Video (≥ 30 sec)	Conceptualization + Production Quality
iii. TVC Showreel / Promotional Video (≤ 2 min)	Conceptualization + Production Quality
iv. Documentary / Scheme Video (> 5 min)	Conceptualization + Production Quality
v. Print / Outdoor / Infographic	Conceptualization + Production Quality

Average score across all five elements determines the final mark out of 10.

Expanded rationale (notes):

This recap table is a direct, almost verbatim structural mirror of Annexure-II's own table format for Clause 4.2.5 — presenting the Committee's own scoring logic back to them in summary form just before the section closes makes their own job of tallying scores easier, and signals that the submission was built with their actual scoresheet in mind throughout.

SLIDE 51 — PART 2 CLOSING

On-slide text:

FIVE FORMATS. ONE STANDARD.
READY FOR THE NEXT BRIEF.

Expanded rationale (notes):

A short, confident closing line for the section — deliberately brief, in contrast to the more elaborate methodology slides just before it (43, 44, 46–48), so the section ends on a clean, memorable beat rather than trailing off after a string of explanatory slides. "Ready for the next brief" also functions as a quiet, forward-looking transition into Part 3 (the Ministry's actual current brief — the Clause 4.2.6 campaign), without explicitly naming it yet.

SLIDE 52 — PART 3 DIVIDER

On-slide text:

PART 3

CAMPAIGN DESIGN AND SCRATCH CREATIVES

Clause 4.2.6 — Primary Campaign Route

Expanded rationale (notes):

Naming this explicitly as the "Primary Campaign Route" on the divider itself sets up the Committee's expectation that an alternate route will follow later — avoiding any confusion later when Route 2 (slide 107 onward) appears, since they'll already understand this deck intentionally offers two options rather than presenting two unrelated, competing ideas.

SLIDE 53 — THE ASSIGNED THEME

On-slide text:

THE THEME

From Tribal Heritage to Future Leadership:
Empowering Tribal Communities for Viksit Bharat 2047

This is the Ministry's brief, taken exactly as given — and built into a complete, executable national campaign.

Expanded rationale (notes):

Reproducing the Annexure-I theme title verbatim, rather than paraphrasing it, is a deliberate choice — it shows the Committee unambiguously that the campaign that follows was built against their exact wording, not a loosely related interpretation. "Taken exactly as given" makes this explicit rather than implicit.

SLIDE 54 — READING THE BRIEF

On-slide text:

WHAT THE BRIEF IS REALLY ASKING FOR

Strip away the language and the brief asks one question:

Can tribal heritage and India's future sit in the same frame, without one diminishing the other?

Our answer is the campaign that follows.

Expanded rationale (notes):

This slide performs a useful function for a live presentation specifically — it shows the Committee the agency's own interpretive process (how a long, multi-paragraph brief was distilled to a single question) before revealing the answer. This is the kind of "thinking out loud" moment that's harder to convey in a written deck alone but lands well when presented verbally, since it demonstrates strategic reasoning rather than just creative output.

SLIDE 55 — THE CENTRAL CAMPAIGN IDEA

On-slide text:

THE CENTRAL CAMPAIGN IDEA

Heritage is not where the journey started.

Heritage is what is still carrying the journey forward.

Every creative under this campaign opens on a thread of tribal heritage and follows it into a contemporary act of leadership — never the reverse.

Expanded rationale (notes):

"Never the reverse" is a deliberate, explicit creative constraint stated on-slide — it tells the Committee that sequence (heritage first, leadership second, always) is not incidental but a defining rule of the campaign's internal logic, directly answering the RfP's own framing ("From Tribal Heritage to Future Leadership") in its exact word order.

SLIDE 56 — THE CAMPAIGN TAGLINE

On-slide text:

THE CAMPAIGN TAGLINE

जड़ों से उड़ान तक — विकसित भारत 2047

("From Roots to Flight — Viksit Bharat 2047")

Roots signal heritage, ancestry, and ecological knowledge.

Flight signals leadership, aspiration, and forward motion.

Together, they hold the entire brief in four words.

Expanded rationale (notes):

"Hold the entire brief in four words" is making an explicit, checkable claim — the Committee can mentally verify it themselves by re-reading the Annexure-I theme text and confirming that "roots" and "flight" do meaningfully compress "heritage/ancestral wisdom" and "future leadership/Viksit Bharat 2047" respectively. A tagline claim that can be verified against the brief's own language is stronger than one that simply sounds good.

SLIDE 57 — WHY THIS TAGLINE WORKS**On-slide text:**

WHY THIS TAGLINE WORKS

It is rooted, not romanticised — heritage is a foundation, not a museum piece.

It is forward-facing, not announcement-led — leadership, not scheme delivery, is the hero.

It is inclusive — "उड़ान" (flight) belongs to every tribal citizen the campaign features, not a single hero figure.

Expanded rationale (notes):

Each of these three justifications maps to a specific risk this category of brief commonly runs into: over-romanticising tradition (museum-ifying heritage), letting government schemes dominate the narrative instead of people, and building a campaign around one symbolic hero rather than a community of equally valid stories. Naming these risks and showing how the tagline avoids each one is stronger than simply asserting the tagline is "good."

SLIDE 58 — THE PERCEPTION SHIFT**On-slide text:**

THE PERCEPTION SHIFT THIS CAMPAIGN CREATES

OLD LENS:

Tribal communities are seen as recipients of welfare and protection.

NEW LENS:

Tribal communities are seen as active definers of India's cultural identity and economic future.

This changes the conversation from sympathy to respect, from beneficiary to contributor, from distance to participation.

Expanded rationale (notes):

The three paired contrasts at the close (sympathy→respect, beneficiary→contributor, distance→participation) are a direct structural echo of your old deck's equivalent slide ("FROM: SYMPATHY → RESPECT / WELFARE → EMPOWERMENT / ISOLATION → PARTICIPATION"). This device worked well previously because it gives the Committee a simple, three-line mental model for what the campaign is trying to change — recommend keeping this exact three-pair structure rather than expanding or reducing it, since three is the right number for retention.

SLIDE 59 — THE STORY ARC

On-slide text:

THE STORY ARC OF THE CAMPAIGN

ROOTS — heritage, language, craft, ecological wisdom

RISE — education, skilling, entrepreneurship, digital access

LEAD — tribal citizens as visible architects of Viksit Bharat 2047

Every format in this campaign — film, print, social, radio — follows this same three-beat arc.

Expanded rationale (notes):

"Roots / Rise / Lead" gives the campaign a structural skeleton that every individual deliverable can be checked against later in the deck — when each of the eight creatives is presented (slides 70 onward), the Committee should be able to recognise this same three-beat shape recurring in the print ad, the video, the animation, and so on. This consistency is itself part of what should earn marks under "Conceptualization."

SLIDE 60 — THE THREE PILLARS OF THIS CAMPAIGN

On-slide text:

THE THREE PILLARS OF THIS CAMPAIGN

PILLAR 1 — Heritage as Foundation

Celebrating language, craft, ecological knowledge, and cultural identity.

PILLAR 2 — Opportunity as Bridge

Education, skilling, digital inclusion, and entrepreneurship as the link between heritage and leadership.

PILLAR 3 — Leadership as Outcome

Tribal students, entrepreneurs, artisans, athletes, and women leaders as the visible face of Viksit Bharat 2047.

Expanded rationale (notes):

Note that this campaign-specific three-pillar structure (Heritage/Opportunity/Leadership) is a deliberate subset of the broader four-pillar strategy introduced in Part 1 (Heritage/Opportunity/Contribution/Leadership) — Contribution is folded into "Opportunity as Bridge" and "Leadership as Outcome" here rather than kept as a fourth separate pillar, since a single campaign route benefits from a tighter three-act structure (Foundation → Bridge → Outcome) rather than four. This is intentional simplification for creative execution, not an inconsistency with Part 1.

SLIDE 61 — PILLAR 1 IN DETAIL

On-slide text:

PILLAR 1: HERITAGE AS FOUNDATION

What this pillar celebrates:

Tribal languages and oral traditions, craft and visual art, ecological and agricultural wisdom, and community governance systems refined over centuries.

Campaign role:

Builds pride, visibility, and the credibility on which the rest of the campaign stands.

How this shows up creatively:

Every "Heritage" beat in the campaign opens on a specific, named practice — never a generic "tribal tradition" — because specificity is what makes heritage feel real rather than symbolic.

Expanded rationale (notes):

The "How this shows up creatively" addition (not present on the original three-pillar slides in Section 3's first draft) is a deliberate enrichment for the in-depth version — it gives this slide a concrete creative instruction, not just a strategic description, which is more useful to a Committee evaluating actual creative output under this clause.

SLIDE 62 — PILLAR 2 IN DETAIL

On-slide text:

PILLAR 2: OPPORTUNITY AS BRIDGE

What this pillar shows:

EMRS classrooms, scholarship recipients, Van Dhan entrepreneurs, digitally skilled youth, and PM JANMAN and DAJGUA reaching the last mile.

Campaign role:

Converts policy into a visible, human story of momentum — proof that heritage and progress are not in competition.

How this shows up creatively:

Scheme names appear only as small, factual captions beneath a person's story — never as the headline of a creative. The visual always leads with the person's action, not the programme's name.

Expanded rationale (notes):

This caption-placement rule is an explicit, practical creative guideline (scheme name as caption, not headline) that a designer or art director could apply directly when building the actual creative assets — useful because it converts strategic intent into a production-level instruction.

SLIDE 63 — PILLAR 3 IN DETAIL

On-slide text:

PILLAR 3: LEADERSHIP AS OUTCOME

What this pillar positions tribal citizens as:

Students topping their class, entrepreneurs exporting GI-tagged crafts, athletes representing India, and women leading community institutions.

Campaign role:

Makes tribal leadership visible at the scale Viksit Bharat 2047 requires.

How this shows up creatively:

Every "Leadership" beat closes on an image of forward motion — a graduation, a market stall mid-transaction, a finish line, a microphone — never a static portrait alone.

Expanded rationale (notes):

Specifying "forward motion" imagery (graduation, transaction, finish line) as the closing visual device for this pillar gives art direction a concrete, repeatable rule that should visibly differentiate Leadership-pillar creatives from Heritage-pillar creatives (which lean static and rooted) at a glance — useful for maintaining visual variety across the eight deliverables while staying within one campaign system.

SLIDE 64 — INTEGRATING MINISTRY SCHEMES

On-slide text:

WEAVING IN MINISTRY INITIATIVES

PM JANMAN, DAJGUA, EMRS, scholarships, Van Dhan Yojana, and TRIFED are not separate campaign chapters — they are evidence woven into the heritage-to-leadership story at the right beat of the arc.

A scheme never opens a story. A person does.
The scheme is what made their next chapter possible.

Expanded rationale (notes):

This slide directly answers the RfP's explicit instruction at Annexure-I to "integrate major initiatives of the Ministry of Tribal Affairs... weaving them into a unified narrative" — by stating clearly *how* the weaving happens (sequence: person first, scheme second, framed as enabler not initiator) rather than just confirming that the schemes will be mentioned somewhere in the campaign.

SLIDE 65 — AUDIENCE MAP

On-slide text:

WHO THIS CAMPAIGN SPEAKS TO

General public — builds national respect and pride in tribal contribution.

Tribal youth — offers identity paired with aspiration, not identity instead of aspiration.

Policy stakeholders and institutions — demonstrates measurable development through an emotionally resonant narrative.

Expanded rationale (notes):

"Identity paired with aspiration, not identity instead of aspiration" is a precise distinction

worth keeping exactly as worded — it's a subtle but important guardrail against a common failure mode in this kind of campaign, where heritage content can unintentionally read as telling young tribal viewers to stay rooted in tradition rather than also pursue ambition. Stating the "paired with, not instead of" framing pre-empts that misreading.

SLIDE 66 — TONE PRINCIPLES

On-slide text:

HOW THE CAMPAIGN SHOULD SOUND

Respectful, never patronising.

Aspirational and future-facing.

Authentic — grounded in real lives, not staged stereotypes.

Nation-building — every individual story links to India's collective progress.

What we avoid:

Pity-led storytelling. Over-romanticised hardship. Outdated tribal clichés.

Expanded rationale (notes):

This four-principle plus three-avoidance structure is carried over almost exactly from your old deck's equivalent "Tone Principles" slide for Campaign Route 2 — a strong, well-tested device because it gives both a positive direction (what to do) and a negative guardrail (what to avoid) in one compact slide, which is more actionable for a creative team than positive guidance alone.

SLIDE 67 — VISUAL WORLD

On-slide text:

WHAT THE CAMPAIGN SHOULD LOOK LIKE

Earthy, rooted textures paired with indigenous motifs.

Human portraits shot with dignity — never as anthropological subjects.

Visible signs of momentum — classrooms, digital tools, entrepreneurship — placed in the same frame as heritage, not in a separate "after" image.

Design principle:

Not Then-and-Now, but **Heritage-and-Momentum, together, in one frame.**

Expanded rationale (notes):

"Never as anthropological subjects" is a deliberately strong, specific phrase — it names a real historical failure mode in how tribal communities have sometimes been photographed for government and development communication (distant, observational, othering), and explicitly rules it out. The "Heritage-and-Momentum, together, in one frame" principle is carried over directly from your old deck's design contrast logic ("Then + Now is too simplistic. Instead show Heritage + Momentum together") because it remains the single clearest visual instruction in either deck.

SLIDE 68 — WHY THIS ROUTE IS STRATEGICALLY STRONG

On-slide text:

WHY THIS ROUTE IS STRATEGICALLY STRONG

It aligns directly with the Viksit Bharat 2047 national narrative.

It reinforces tribal pride without reducing the Ministry's communication to only celebration.

It gives the Ministry a voice that is simultaneously human and visionary.

It is built to scale across every format the RfP requires.

Expanded rationale (notes):

"Without reducing the Ministry's communication to only celebration" is an important, more sophisticated point worth keeping — it acknowledges that a campaign that is purely celebratory, with no acknowledgment of real ongoing work and challenges, can read as shallow or evasive to a sophisticated audience. This line signals the campaign holds both pride and credibility simultaneously.

SLIDE 69 — TRANSITION TO DELIVERABLES

On-slide text:

FROM STRATEGY TO SCRATCH CREATIVES

What follows are the eight original deliverables required under Clause 4.2.6 — each built from the same campaign idea, the same tagline, and the same heritage-to-leadership arc.

Expanded rationale (notes):

This bridge slide marks the exact moment the deck shifts from strategic justification (slides 53–68) into actual deliverable presentation (70 onward) — a clean handoff point, and a

natural place for a live presenter to pause and confirm the Committee is following before moving into the longer creative-by-creative section.

SLIDE 70 — DELIVERABLE 1 DIVIDER

On-slide text:

DELIVERABLE 1

CAMPAIGN LOGO & TAGLINE

SLIDE 71 — LOGO & TAGLINE: CONCEPT NOTE

On-slide text:

THE LOGO CONCEPT

The mark combines a root motif and a rising line — heritage and ascent rendered as one continuous form, never two disconnected halves.

Tagline: जड़ों से उड़ान तक — विकसित भारत 2047

[Embed: Logo lockup, colour and monochrome versions]

Expanded rationale (notes):

"Never two disconnected halves" is a deliberate craft note for the actual designer — it instructs that the root and the rising line must be drawn as a single unbroken contour (e.g. a root that curls and extends upward into a wing or flight-line) rather than two separate icon elements simply placed side by side, since the latter would visually contradict the campaign's "Roots to Flight" idea of continuous transformation.

SLIDE 72 — LOGO & TAGLINE: DESIGN RATIONALE

On-slide text:

WHY THIS DESIGN

The root form is drawn from tribal textile and craft motifs rather than a generic tree icon — keeping the mark specific to the campaign's source culture rather than a stock symbol of growth.

Colour palette:

Earth tones (terracotta, forest green, ochre) paired with a single accent (saffron or indigo) signalling national identity.

Typography note:

A typeface pairing one warm, slightly textured display face (for the tagline, evoking handcraft) with one clean, modern sans-serif (for the Ministry name and any scheme references, evoking institutional clarity).

Expanded rationale (notes):

The typography note is a new addition for this in-depth version, since type choice is often where a logo system either reinforces or undermines its own concept — a textured, handcrafted display face for "जड़ों से उड़ान तक" paired with a clean institutional sans for formal Ministry references lets the single lockup hold both the heritage and the institutional-leadership halves of the brief simultaneously.

SLIDE 73 — DELIVERABLE 2 DIVIDER**On-slide text:**

DELIVERABLE 2

ONE FULL-PAGE PRINT CREATIVE

SLIDE 74 — PRINT CREATIVE: CONCEPT NOTE**On-slide text:**

CONCEPT

A single tribal artisan's hands at work, mid-craft, with the finished product transforming mid-frame into a contemporary symbol of achievement — a certificate, a digital device, an export carton marked GI-tagged.

One visual. One unbroken gesture. The shift from heritage to leadership happens in a single frame.

[Embed: Full-page print creative]

Expanded rationale (notes):

"One unbroken gesture" specifies a precise art-direction requirement: the hand position and gesture should remain visually continuous across the transformation within the frame

(e.g. the same hand shape that's weaving thread becomes, through a seamless visual transition, the hand shape holding a tablet or a certificate) — this is what makes the "single frame, single gesture" concept executable rather than just a nice-sounding idea.

SLIDE 75 — PRINT CREATIVE: PRODUCTION NOTES

On-slide text:

PRODUCTION QUALITY

Designed at print-ready resolution for newspaper and magazine placement, with typography and colour calibrated for offset reproduction.

Specifications:

CMYK colour profile, minimum 300 DPI at full-page broadsheet dimensions, bleed and safe-margin guides built into the master file for direct handoff to any newspaper's pre-press team.

Expanded rationale (notes):

Adding the specific technical specifications (CMYK, 300 DPI, bleed/safe margins) gives this slide a level of production rigor that distinguishes a genuinely print-ready file from a digital mockup that merely looks like a print ad — an important distinction for a Committee assessing actual Production Quality, not just visual concept.

SLIDE 76 — DELIVERABLE 3 DIVIDER

On-slide text:

DELIVERABLE 3

ONE OUTDOOR CREATIVE

SLIDE 77 — OUTDOOR CREATIVE: CONCEPT NOTE

On-slide text:

CONCEPT

A hoarding-scale composition: a tribal student in EMRS uniform set against a backdrop woven from traditional textile patterns — heritage as the visual frame around an image of aspiration, not the subject competing with it.

Headline: जड़ों से उड़ान तक।

[Embed: Outdoor creative]

Expanded rationale (notes):

"Heritage as the visual frame... not the subject competing with it" is a precise compositional instruction: the textile pattern should function as a background/border treatment that frames the student, rather than being given equal visual weight as a competing subject — this hierarchy (person as primary subject, heritage motif as supporting frame) is what should make the outdoor execution legible from a moving vehicle at hoarding distance, where only one clear subject can register.

SLIDE 78 — OUTDOOR CREATIVE: PRODUCTION NOTES

On-slide text:

PRODUCTION QUALITY

Built for legibility at distance — large type, high colour contrast, and a single clear visual subject, tested against standard hoarding viewing distances.

Specifications:

Headline type sized for legibility from a minimum 30-metre viewing distance at standard hoarding dimensions (40ft x 20ft), with contrast ratios checked against both daylight and low-light/streetlight viewing conditions.

Expanded rationale (notes):

Specifying an actual viewing distance and dimension standard (30 metres, 40x20ft) — along with checking contrast under both daylight and low-light conditions — demonstrates a level of practical outdoor-media production knowledge that goes beyond generic creative description, directly relevant to the "Overall Production Quality" scoring criterion.

SLIDE 79 — DELIVERABLE 4 DIVIDER

On-slide text:

DELIVERABLE 4

SLIDE 80 — INFOGRAPHIC 1: CONCEPT NOTE

On-slide text:

INFOGRAPHIC 1 — HERITAGE BY THE NUMBERS

Concept: a single striking statistic on tribal heritage (languages, GI-tagged crafts, forest stewardship) presented as a bold number with minimal supporting text — built for a five-second scroll-stop.

[Embed: Infographic 1]

Expanded rationale (notes):

"Five-second scroll-stop" names the actual design target for social infographics explicitly — the test for success isn't whether the infographic looks attractive in isolation, but whether it would genuinely interrupt a scrolling thumb on a phone screen. This framing should guide layout decisions (number size, colour contrast, amount of text) toward the goal that actually matters for this format.

SLIDE 81 — INFOGRAPHIC 2: CONCEPT NOTE

On-slide text:

INFOGRAPHIC 2 — OPPORTUNITY IN ACTION

Concept: a simple before-to-now data visual showing growth in EMRS enrolment, scholarship reach, or Van Dhan incomes — proof, not promise.

[Embed: Infographic 2]

Expanded rationale (notes):

"Proof, not promise" distinguishes this infographic's intent from typical government scheme communication, which often promises future outcomes ("X will achieve Y") rather than reporting verified past outcomes ("X has already achieved Y") — choosing real, already-occurred growth data keeps this infographic in the more credible, "Contribution"-pillar register rather than slipping into announcement-style messaging the brief explicitly wants to move away from.

SLIDE 82 — INFOGRAPHICS: PRODUCTION NOTES

On-slide text:

PRODUCTION QUALITY

Built natively for square and vertical social formats, with source citation included on every infographic to maintain factual credibility.

Specifications:

Master files built at 1080x1080 (square) and 1080x1920 (vertical/Story) simultaneously from one design system, ensuring consistent typography and colour across both formats without a separate re-design pass.

Expanded rationale (notes):

Specifying both square and vertical dimensions, built from one shared design system, addresses a practical reality of social publishing — most platforms now support multiple aspect ratios, and a genuinely production-ready infographic should be delivered in both from the start, not redesigned later when a different format is needed.

SLIDE 83 — DELIVERABLE 5 DIVIDER

On-slide text:

DELIVERABLE 5

PRODUCTION OF TWO REELS OR SHORTS
(up to 30 seconds each)

SLIDE 84 — REEL 1: CONCEPT NOTE

On-slide text:

REEL 1 — "THE HANDS THAT STILL BUILD"

Concept: close-up craft footage — weaving, carving, or pottery — cutting directly to the same hands operating a smartphone, a laptop, or a market stall. No voiceover. Music and motion carry the story.

[Embed: Reel 1]

Expanded rationale (notes):

This reel is the most literal execution of the "Roots to Flight" device at the level of a single visual match-cut (craft hands → digital/entrepreneurial hands) — recommend this be storyboarded with the cut happening on a matching hand gesture or position, so the transition reads as continuous motion rather than two separate clips edited together.

SLIDE 85 — REEL 2: CONCEPT NOTE**On-slide text:**

REEL 2 — "FROM CLASSROOM TO COUNTRY"

Concept: a day in the life of an EMRS student, told in quick cuts — morning routine, classroom, sport or art activity — closing on a single caption: "This is what Viksit Bharat looks like."

[Embed: Reel 2]

Expanded rationale (notes):

This reel deliberately uses a "day in the life" structure rather than a single before/after moment (as Reel 1 does), giving the two reels distinct internal rhythms within the same campaign system — useful variety so the Committee doesn't see two structurally identical pieces when evaluating Creativity specifically.

SLIDE 86 — REELS: PRODUCTION NOTES**On-slide text:**

PRODUCTION QUALITY

Shot vertically (9:16), colour-graded for native social feed appearance, with captions burned in for sound-off viewing — the standard for scroll-based platforms.

Specifications:

Both reels delivered at 1080x1920, 30fps minimum, with burned-in captions positioned to avoid platform UI overlap zones (top 15% and bottom 20% of frame reserved for platform interface elements).

Expanded rationale (notes):

The UI overlap zone specification (top 15%/bottom 20% reserved) is a genuinely important, often-overlooked production detail for vertical social video — captions or key

visual information placed in those zones get obscured by the platform's own interface (like buttons, captions bar, profile info), so accounting for this in the original edit, rather than discovering it after publishing, is a real production-quality signal.

SLIDE 87 — DELIVERABLE 6 DIVIDER

On-slide text:

DELIVERABLE 6

ONE ANIMATION VIDEO
(up to 60 seconds)

SLIDE 88 — ANIMATION VIDEO: CONCEPT NOTE

On-slide text:

CONCEPT — "ROOTS TO FLIGHT"

A 60-second animated film opening on illustrated roots spreading beneath tribal motifs, growing upward into a tree whose branches become roads, school buildings, digital signals, and a rising bird in flight.

Closing frame: the campaign tagline, with the Viksit Bharat 2047 mark.

[Embed: Animation video]

Expanded rationale (notes):

The progression described here (roots → tree → branches transforming into roads/buildings/signal towers → bird in flight) gives a clear, storyboard-able visual sequence rather than an abstract mood description — each named element (roads, school buildings, digital signals) corresponds directly to a specific pillar from the brief (infrastructure/opportunity, education, digital inclusion), so the animation literally illustrates the brief's own list of contemporary opportunities as it unfolds.

SLIDE 89 — ANIMATION VIDEO: PRODUCTION NOTES

On-slide text:

PRODUCTION QUALITY

Original illustration style drawing on tribal art forms (Warli, Gond, Saura) rather than generic stock animation, paired with an original score and no licensed music.

Specifications:

Frame rate of 24fps for the illustrated sequences, rendered at minimum 1920x1080, with the original score composed and recorded specifically for this film rather than licensed from a stock library.

Expanded rationale (notes):

Explicitly naming three real tribal art traditions (Warli, Gond, Saura) rather than saying "tribal-inspired art" signals genuine research and specificity rather than a generic gesture toward "tribal aesthetics" — recommend the actual production team choose and commit to one specific tradition (rather than blending all three) so the illustration style reads as authentic to a particular visual language rather than a generic pan-tribal pastiche.

SLIDE 90 — DELIVERABLE 7 DIVIDER

On-slide text:

DELIVERABLE 7

ONE VIDEO

(up to 60 seconds)

SLIDE 91 — VIDEO: CONCEPT NOTE

On-slide text:

CONCEPT — "जड़ों से उड़ान तक"

A live-action 60-second film: opens at dawn in a tribal village — a weaver at her loom, a farmer in a Van Dhan field — and intercuts forward to the same individuals in moments of visible achievement: a market stall, a graduation, a stage.

One line of voiceover, spoken once, at the close:

"जड़ों से उड़ान तक — विकसित भारत 2047।"

[Embed: 60-second video]

Expanded rationale (notes):

"One line of voiceover, spoken once" is a deliberate minimalism rule, consistent with the broader campaign principle (seen also in Reel 1) of letting visuals carry the story rather

than narration — restricting voiceover to a single closing line, rather than narrating throughout, keeps the film from feeling like an explainer video and keeps it in the more cinematic, emotionally driven register this format calls for.

SLIDE 92 — VIDEO: PRODUCTION NOTES

On-slide text:

PRODUCTION QUALITY

Multi-location shoot, professional colour grading, and a sound mix built for both television and mobile playback.

Specifications:

Minimum two distinct shoot locations (village/heritage setting and achievement/leadership setting), graded to a consistent colour language across both, with separate audio masters for broadcast (stereo, -23 LUFS) and mobile/social (louder mix, -16 LUFS) playback contexts.

Expanded rationale (notes):

The LUFS (loudness) specifications are a genuine technical detail that distinguishes professional broadcast-and-social delivery from amateur work — broadcast and mobile platforms have different loudness standards, and delivering two correctly calibrated masters (rather than one mix used everywhere) is a real production-quality marker that a technically informed evaluator would recognise.

SLIDE 93 — DELIVERABLE 8 DIVIDER

On-slide text:

DELIVERABLE 8

ONE RADIO JINGLE
(up to 60 seconds)

SLIDE 94 — RADIO JINGLE: CONCEPT NOTE

On-slide text:

CONCEPT

A jingle built on a folk melodic structure native to a tribal belt region, with lyrics that move — in sound and meaning — from rootedness to rising, ending on the campaign tagline as a sung line, not a spoken tag.

[Embed: Radio jingle audio]

Expanded rationale (notes):

"Move, in sound and meaning, from rootedness to rising" specifies that the melodic structure itself (not just the lyrics) should reflect the campaign's arc — for instance, the melody might begin in a lower register with a traditional folk instrument (like a dhol, tribal flute, or string instrument specific to the chosen region) and modulate upward or add more contemporary instrumentation as it progresses, mirroring the "Roots to Flight" idea musically, not just lyrically.

SLIDE 95 — RADIO JINGLE: PRODUCTION NOTES

On-slide text:

PRODUCTION QUALITY

Recorded with live instrumentation rather than stock loops, mixed for AM/FM broadcast clarity and for use as a hold-audio and event ID across MoTA touchpoints.

Specifications:

At least one live traditional instrument recorded specifically for this jingle (not sampled), mixed and mastered to broadcast loudness standards, delivered in both a full 60-second version and a 15-second cutdown for shorter ad slots.

Expanded rationale (notes):

Specifying both a full and a 15-second cutdown version is a practical production-quality addition — radio buying often requires multiple spot lengths, and delivering both from the original recording session (rather than only the 60-second version, requiring a separate re-edit later) is a small but real signal of forward-thinking production planning.

SLIDE 96 — DELIVERABLES RECAP

On-slide text:

CLAUSE 4.2.6: DELIVERABLES RECAP

#	Deliverable
i.	Campaign Logo & Tagline
ii.	One Full-Page Print Creative
iii.	One Outdoor Creative
iv.	Two Social Media Infographics
v.	Two Reels or Shorts (≤30 sec each)
vi.	One Animation Video (≤60 sec)
vii.	One Video (≤60 sec)
viii.	One Radio Jingle (≤60 sec)

Scored on Creativity, Conceptualization, and Overall Production Quality — averaged across all eight to a final score out of 20.

Expanded rationale (notes):

This recap table mirrors Annexure-II's own eight-item list and scoring structure for Clause 4.2.6 almost exactly, in the same way slide 50 did for Clause 4.2.5 — giving the Committee a clean checkpoint confirming all eight required elements have indeed been shown, immediately useful for their own scoresheet completion.

SLIDE 97 — HOW THE EIGHT PIECES WORK TOGETHER

On-slide text:

ONE CAMPAIGN, EIGHT TOUCHPOINTS

Every deliverable carries the same tagline, the same root-to-flight visual logic, and the same three-pillar narrative — so that a citizen encountering any single piece, on any single platform, recognises the same campaign.

Expanded rationale (notes):

This slide functions as the campaign's own "consistency audit" — explicitly stating the claim that all eight pieces share a recognisable system invites the Committee to mentally check this themselves by glancing back through the previous 26 slides, which is a stronger proof of consistency than simply asserting it once and moving on.

SLIDE 98 — CREATIVITY NOTE**On-slide text:**

ON CREATIVITY

Creativity here is not novelty for its own sake — it is finding a fresh visual language for a brief the Ministry has run before, without repeating the visual clichés (sympathy imagery, generic "tribal motif" borders) that this category often falls into.

Expanded rationale (notes):

This slide directly addresses "Creativity" as its own named scoring criterion (6 of the 20 marks) by defining what creativity means in this specific context — distinguishing it from generic novelty, and naming the actual visual clichés (sympathy imagery, decorative-only tribal motifs) the campaign was built to avoid. This shows the Committee the agency understands what makes creative work in this particular category typically weak, and has deliberately steered away from it.

SLIDE 99 — CONCEPTUALIZATION NOTE**On-slide text:**

ON CONCEPTUALIZATION

Every deliverable was built backward from the same single sentence:

"Heritage is what is still carrying India's future forward."

If a creative could not clearly express that sentence, it was rebuilt.

Expanded rationale (notes):

"If a creative could not clearly express that sentence, it was rebuilt" implies an iterative creative process — a small but meaningful claim, since it suggests rigour and self-editing rather than a single first-draft execution being presented as final. This directly supports the "Conceptualization" criterion (8 of the 20 marks, the single largest weighting in this clause).

SLIDE 100 — PRODUCTION QUALITY NOTE

On-slide text:

ON PRODUCTION QUALITY

Across video, print, audio, and digital, production quality means platform-fit, technical correctness, and finishing discipline — not just aesthetic polish.

Expanded rationale (notes):

"Not just aesthetic polish" is an important distinction for the Committee to hold in mind across all eight deliverables — a visually beautiful but technically incorrect file (wrong colour profile, wrong aspect ratio, captions misplaced under platform UI) should be scored differently from one that is both beautiful and technically correct, and this slide names that distinction explicitly rather than leaving it assumed.

SLIDE 101 — RISK & SENSITIVITY NOTE

On-slide text:

HANDLING SENSITIVITY WITH CARE

Every creative was reviewed against one standard: does this dignify the community it features, or does it use them as a backdrop?

Anything that read as performative or extractive was discarded before reaching this deck.

Expanded rationale (notes):

This slide is particularly important given the RfP's own brief language explicitly cautions toward genuine empowerment narratives rather than superficial representation. Including a slide that names a clear, single ethical filter applied to every creative ("dignify or backdrop?") demonstrates the kind of self-governance a government Ministry would want from a long-term communication partner handling sensitive community representation.

SLIDE 102 — DISTRIBUTION THINKING

On-slide text:

WHERE THESE CREATIVES LIVE

Print and outdoor anchor the campaign in physical, civic spaces.

Reels and animation carry it across Instagram, YouTube Shorts, and Facebook.

The radio jingle extends reach into regions where digital penetration is lower.

Infographics serve as the shareable, save-able layer across all platforms.

Expanded rationale (notes):

This slide makes explicit that the eight deliverables aren't simply eight separate formats produced in isolation, but a deliberately distributed system covering different reach contexts (physical/civic, digital/social, low-connectivity/radio) — useful for showing the Committee that media planning logic, not just creative execution, informed which formats were prioritised for which audience.

SLIDE 103 — SCALABILITY NOTE

On-slide text:

BUILT TO SCALE BEYOND THIS BRIEF

Every asset in this campaign is built with a modular structure — the same visual system and tagline can extend into vernacular adaptations, state-specific versions, and scheme-specific spin-offs without breaking the core idea.

Expanded rationale (notes):

This slide is forward-looking toward the actual retainership relationship beyond this single technical evaluation — signalling that the campaign system isn't a one-off, single-use creative burst but a reusable framework the Ministry could extend into future months of the retainership (e.g. a Van Dhan-specific spin-off, or a Hindi-belt vernacular version) without commissioning an entirely new creative direction each time.

SLIDE 104 — WHY THIS WINS THE BRIEF

On-slide text:

WHY THIS ROUTE ANSWERS THE BRIEF DIRECTLY

It connects tribal heritage, ancestral wisdom, and cultural identity (as asked) to education, entrepreneurship, digital inclusion, and sustainable livelihoods (as asked) — through one continuous visual and narrative device, not eight disconnected executions.

Expanded rationale (notes):

The parenthetical "(as asked)" twice in this single slide is a deliberate, slightly unusual rhetorical choice — it makes explicit, almost pointedly, that every major phrase in this sentence is lifted directly from the RfP's own Annexure-I theme text, leaving the Committee with no ambiguity about whether the brief was actually read and answered point by point.

SLIDE 105 — CLOSING STATEMENT FOR PRIMARY ROUTE**On-slide text:**

FROM HERE, INDIA RISES.

This is not eight creatives loosely tied to a theme.

It is one campaign idea, executed eight times, with discipline.

Expanded rationale (notes):

"From Here, India Rises" is a deliberate echo of your old deck's signature closing device ("From Here, India Takes Shape") adapted for the new theme's emphasis on rising/leadership rather than shaping/defining — keeping a recognisable rhythm with the previous submission's strongest line, while making it specific to this year's "Future Leadership" framing.

SLIDE 106 — TRANSITION TO ALTERNATE ROUTE**On-slide text:**

ONE MORE WAY TO TELL THIS STORY

What follows is a second, suggestive campaign route — offered as an alternate creative direction for the Ministry's consideration.

Expanded rationale (notes):

This is intentionally a quiet, low-key transition rather than another "big" closing statement — having just closed the primary route on a strong rhetorical beat (slide 105), this slide should function purely as a pacing reset before the Committee shifts attention to a second, lighter-weight creative option, not compete with the previous slide's emotional close.

SLIDE 107-126 — Clause 4.2.6: Alternate "Suggestive" Campaign Route, In-Depth

SLIDE 107 — ROUTE 2 DIVIDER

On-slide text:

ALTERNATE ROUTE (SUGGESTIVE)

CAMPAIGN ROUTE 2

A second creative direction on the same assigned theme — offered for the Ministry's consideration alongside the primary route.

Expanded rationale (notes):

Labelling this explicitly as "suggestive" on the divider itself (rather than just "Route 2") sets the right expectation before the Committee sees a single creative — this section is not competing for marks against the primary route as a separate full submission, but offered as supplementary creative thinking. This framing matters because Annexure-II scores Clause 4.2.6 as one mark allocation, not two — so the deck needs to be unambiguous that Route 1 is the actual submission being evaluated and Route 2 is value-added optionality, not a second formal entry.

SLIDE 108 — ROUTE 2 TAGLINE

On-slide text:

THE ALTERNATE TAGLINE

विरासत से विकास तक — सशक्त जनजाति, सशक्त भारत
("From Heritage to Development — Empowered Tribes, Empowered India")

Where Route 1 leans poetic ("Roots to Flight"), Route 2 leans declarative — naming heritage and development directly, and pairing tribal empowerment with national empowerment as one equation.

Expanded rationale (notes):

"विरासत" (heritage/legacy) and "विकास" (development) are deliberately chosen as the most literal, dictionary-level Hindi equivalents of the RfP's own English theme words ("heritage" and "development/Viksit") — where Route 1's tagline works through metaphor (roots, flight), Route 2's tagline works through near-direct translation of the brief's own terms, making it the more immediately legible option for an audience less comfortable with poetic framing, including potentially older or more traditionally minded stakeholders within the Ministry's own review process.

SLIDE 109 — WHY THIS ALTERNATE WORKS

On-slide text:

WHY THIS TAGLINE WORKS

It states the brief almost literally — heritage to development — making it instantly legible to a wide audience, including non-urban and lower-literacy viewers.

It uses repetition ("सशक्त... सशक्त...") as a rhetorical device, linking tribal strength and national strength in the same breath.

It positions empowerment as the shared outcome, not something done to one party by another.

Expanded rationale (notes):

The repetition device ("सशक्त जनजाति, सशक्त भारत" — empowered tribes, empowered India) is a classic Hindi slogan-writing technique (parallel construction, anaphora) commonly used in government and political messaging precisely because it's easy to remember and easy to chant or repeat aloud at public events — a practical consideration for a tagline that may end up used at physical activations like Janjatiya Gaurav Divas, not just in digital and print media. "Not something done to one party by another" directly avoids the old "government gives, community receives" framing the brief explicitly wants to move away from — empowerment here flows in both directions simultaneously.

SLIDE 110 — THE CENTRAL IDEA: ROUTE 2

On-slide text:

THE CENTRAL CAMPAIGN IDEA

Where Route 1 used a single visual thread (roots becoming flight), Route 2 uses parallel proof: a tribal achievement shown directly beside a national outcome it feeds into — side by side, not sequential.

A Van Dhan entrepreneur's product, beside its place on a retail shelf.

An EMRS topper, beside the institution they go on to join.

The "and" is the message: heritage and development, together, not in sequence.

Expanded rationale (notes):

This slide explicitly names the structural difference between the two routes at the level of visual grammar: Route 1 is built on transformation-over-time (a single subject changing

within one continuous frame or cut), while Route 2 is built on simultaneous pairing (two things shown at once, side by side, with no implied "before" state). This distinction matters practically for a designer or director picking up either brief — they require genuinely different shot lists, layouts, and editing approaches, not just different colour palettes or taglines layered onto the same visual plan.

SLIDE 111 — THE PERCEPTION SHIFT: ROUTE 2

On-slide text:

THE PERCEPTION SHIFT

OLD LENS: Tribal contribution is something to be discovered or explained to the public.

NEW LENS: Tribal contribution is something already visible, once placed beside its outcome.

This route works through demonstration, not narration — show the pairing, let the audience draw the conclusion.

Expanded rationale (notes):

"Demonstration, not narration" is the key creative principle distinguishing Route 2 from Route 1 at the level of audience experience: Route 1 tells the audience a story and earns an emotional response through narrative craft (voiceover, music, pacing); Route 2 shows the audience two facts and trusts them to draw the conclusion (heritage produced this outcome) without being told to. This is a deliberately more "respect the audience's intelligence" approach — useful to flag explicitly, since it represents a genuinely different creative philosophy, not just a stylistic variation on the same idea.

SLIDE 112 — THREE PILLARS: ROUTE 2

On-slide text:

THE THREE PILLARS OF THIS ROUTE

PILLAR 1 — Heritage, Named and Owned

Direct, confident naming of tribal knowledge systems and traditions, without euphemism.

PILLAR 2 — Development, Shown as Shared

Government schemes shown as joint outcomes of policy and community effort, not policy alone.

PILLAR 3 — Empowerment, as the Connector

The bridge word that ties both halves of the tagline into one continuous claim.

Expanded rationale (notes):

"Without euphemism" in Pillar 1 is a specific, important instruction: Route 2's more direct creative language calls for direct, specific naming (a named craft, a named practice, a named language) rather than softer collective terms like "rich traditions" or "cultural wealth" that can read as vague or evasive. Pillar 3 naming "empowerment" specifically as "the connector" is structurally important because it identifies the one word doing the actual bridging work in the tagline ("सशक्त... सशक्त...") — useful for any designer or copywriter extending this route into new creative who needs to know which single word carries the weight of the whole concept.

SLIDE 113 — TONE PRINCIPLES: ROUTE 2

On-slide text:

HOW THIS ROUTE SHOULD SOUND

More direct and statement-led than Route 1.

Built for headline impact — short declarative phrases over narrative voiceover.

Confident, not celebratory; this route states facts rather than tells stories.

Expanded rationale (notes):

"Confident, not celebratory" is a subtle but important tonal distinction worth dwelling on: celebratory tone implies an emotional high point being marked (a festival, a milestone, an achievement moment), while confident tone implies a steady, ongoing state of fact that doesn't need special occasion to be true. Route 2's copy should read like a statement that's always been true and is simply being said plainly, not like a special announcement — this keeps it distinct from Route 1's more cinematic, emotionally-arc'd register, and gives the Ministry a genuinely different voice option depending on the context (a quiet, confident statement vs. an emotionally driven story) they want to use for a given moment or platform.

SLIDE 114 — VISUAL WORLD: ROUTE 2

On-slide text:

WHAT THIS ROUTE SHOULD LOOK LIKE

Split-frame or paired-image compositions throughout — heritage object/practice on one side, development outcome on the other, joined by a single connecting graphic element (a road, a thread, a beam of light).

Bolder typography, higher contrast, less ornamental than Route 1 — built for quick public legibility on outdoor and print.

Expanded rationale (notes):

The "single connecting graphic element" instruction (road/thread/beam of light, choose one and use it consistently) is important for visual system discipline — without a deliberately chosen, consistently repeated connector device, a split-frame layout can look like two unrelated images placed next to each other rather than a single considered composition. Recommend the production team pick exactly one connector motif (most likely a thread, given its direct visual link to weaving/craft heritage) and use it across every Route 2 deliverable, the same way Route 1 commits fully to its root-and-flight-line logo motif.

SLIDE 115 — WHY THIS ROUTE IS STRATEGICALLY USEFUL

On-slide text:

WHY THIS ROUTE ADDS VALUE AS AN ALTERNATE

It offers the Ministry a more literal, headline-driven option alongside Route 1's more poetic, narrative-driven approach — useful if internal stakeholders prefer directness over metaphor.

It is faster to localise across languages, since the paired-image structure carries meaning even before translation.

Expanded rationale (notes):

"Carries meaning even before translation" is a genuinely useful practical advantage worth elaborating on: because Route 2's core device is visual pairing (heritage image beside development image) rather than a language-dependent metaphor (roots/flight), the underlying composition would still communicate its core message even if a vernacular audience saw only the visual layout with localised text — strengthening the case for Route 2's particular usefulness in the vernacular and regional extension work outlined back in Part 1 (Slide 142 of the overall deck plan, "Vernacular and Regional Extension").

SLIDE 116 — DELIVERABLES OVERVIEW: ROUTE 2

On-slide text:

ROUTE 2: THE EIGHT DELIVERABLES, CONDENSED

The same eight elements required under Clause 4.2.6, executed through the paired-image, declarative approach described above.

Expanded rationale (notes):

This is a deliberate pacing slide before the deliverable-by-deliverable run — its job is simply to reset the Committee's attention and signal "we're now applying everything just described to the eight required formats," giving the same structural rhythm Route 1 used (strategy section, then transition slide, then deliverables) so the Committee experiences both routes through a familiar, comparable structure.

SLIDE 117 — LOGO & TAGLINE: ROUTE 2

On-slide text:

LOGO & TAGLINE

A mark built from two halves — a traditional motif and a forward-pointing arrow or graph-line — meeting at a central point, visually stating the "from...to..." structure of the tagline itself.

[Embed: Route 2 logo lockup]

Expanded rationale (notes):

Unlike Route 1's logo (a single continuous unbroken form, root flowing into flight-line), Route 2's logo is deliberately constructed from two distinct, separately recognisable halves meeting at a midpoint — this directly reflects Route 2's "paired, not sequential" visual grammar established at slide 110, giving the Committee a clear, consistent visual signal distinguishing the two routes from the very first creative asset shown in each section.

SLIDE 118 — PRINT & OUTDOOR CREATIVE: ROUTE 2

On-slide text:

PRINT CREATIVE & OUTDOOR CREATIVE

Concept: a split-frame composition — a tribal artisan's traditional work on the left, the same individual in a contemporary entrepreneurial or institutional setting on the right, joined by the tagline across the centre.

[Embed: Print creative / Outdoor creative]

Expanded rationale (notes):

Combining print and outdoor into a single concept slide here (rather than two separate slides, as Route 1 did) is intentional — since Route 2's split-frame composition is fundamentally the same layout logic across both formats (only scale and finishing specifications differ between a print page and a hoarding), it would be redundant to repeat the full concept explanation twice. Recommend keeping production-specific notes (resolution, colour profile for print; viewing distance and contrast for outdoor) as brief bullet additions on this same slide rather than separate slides, to keep Route 2's section appropriately lighter than Route 1's, consistent with its "suggestive, not full" status.

SLIDE 119 — SOCIAL MEDIA INFOGRAPHICS: ROUTE 2**On-slide text:**

TWO SOCIAL MEDIA INFOGRAPHICS

Infographic 1: heritage statistic (languages, crafts, forest cover under tribal stewardship).

Infographic 2: development statistic (scheme reach, income growth, enrolment growth) — designed as a visual pair, postable individually or together.

[Embed: Infographic 1 / Infographic 2]

Expanded rationale (notes):

"Postable individually or together" is a practical social-media planning consideration worth keeping explicit: because both infographics share the same paired visual system, the Ministry's social team could choose to post them as a connected two-part post on launch day, then re-use either one individually in later weeks as a standalone piece of content — giving more flexible mileage from two assets than two visually unrelated infographics would offer.

SLIDE 120 — REELS: ROUTE 2**On-slide text:**

PRODUCTION OF TWO REELS
(up to 30 seconds each)

Reel 1: a split-screen format — heritage practice on one half of the frame, development outcome on the other, synced to a single beat of music.

Reel 2: rapid-fire paired stills (heritage/development) cut to rhythm, captioned with single-word labels ("विरासत" / "विकास").

[Embed: Reel 1 / Reel 2]

Expanded rationale (notes):

Reel 2's structure — rapid-fire paired stills cut to rhythm rather than continuous motion footage — is a genuinely different production approach from anything in Route 1's reel pair, giving Route 2 a visually distinct identity at the level of editing technique, not just colour palette or tagline. The single-word captions ("विरासत" / "विकास") reinforce the same literal, declarative vocabulary established in the tagline itself, keeping language consistent down to the smallest on-screen text across the entire route.

SLIDE 121 — ANIMATION VIDEO: ROUTE 2

On-slide text:

ONE ANIMATION VIDEO
(up to 60 seconds)

Concept: an animated map of India filling in with tribal motifs and modern infrastructure icons simultaneously, region by region, closing on the full tagline.

[Embed: Animation video]

Expanded rationale (notes):

"Simultaneously, region by region" is the key structural instruction here — rather than Route 1's animation (a single tree growing through a linear sequence of stages), Route 2's animation should illustrate multiple regions of India filling in together, in parallel, as the map progresses — visually reinforcing Route 2's core "paired/simultaneous" logic at a national scale, and giving the Ministry a literal, recognisable map-of-India visual that could double as a standalone explainer of geographic reach across tribal-belt states.

SLIDE 122 — ONE VIDEO: ROUTE 2

On-slide text:

ONE VIDEO
(up to 60 seconds)

Concept: a documentary-style split-screen film — left frame shows heritage practice in long, slow shots; right frame shows the same community's development outcomes in quicker, energetic cuts — both halves resolving into a single full-frame shot at the close.

[Embed: 60-second video]

Expanded rationale (notes):

The deliberate contrast in editing pace between the two frames (slow on the heritage side, fast on the development side) is itself a meaningful creative choice worth naming explicitly — it visually encodes the idea that heritage is enduring and unhurried while development is energetic and accelerating, without needing a single word of voiceover to state it. The resolution into one full-frame shot at the close mirrors Route 1's own closing instinct (a unifying final frame) while arriving there through the opposite structural method (convergence of two parallel frames, rather than a single continuous transformation).

SLIDE 123 — RADIO JINGLE: ROUTE 2

On-slide text:

ONE RADIO JINGLE
(up to 60 seconds)

Concept: a call-and-response structure — one voice sings of heritage, a second voice answers with development, both voices joining for the final line of the tagline together.

[Embed: Radio jingle audio]

Expanded rationale (notes):

Call-and-response is a structure deeply familiar in many Indian folk and devotional musical traditions, making it a culturally resonant choice rather than an arbitrary structural device — recommend the production team draw the specific call-and-response pattern from a regional folk tradition relevant to whichever tribal belt state the jingle is contextualised for, the same way Route 1's jingle calls for a regionally specific melodic structure. The two voices joining only for the final tagline line mirrors, in audio form, the same "two halves becoming one" logic seen in Route 2's logo design (slide 117) and its closing video shot (slide 122) — a consistent device across formats.

SLIDE 124 — ROUTE COMPARISON

On-slide text:

ROUTE 1 vs ROUTE 2: AT A GLANCE

	Route 1: "Roots to Flight"	Route 2: "Heritage to Development"
Creative device	Poetic, sequential, narrative-led	Declarative, paired, statement-led
Visual grammar	Continuous transformation in one frame	Split-frame / paired composition
Best suited for	An emotionally driven, story-first campaign	A faster-reading, headline-first campaign
Tone	Cinematic, aspirational	Direct, confident

Both routes share the same four pillars, the same factual foundation, and the same scheme integration — only the creative device differs.

Expanded rationale (notes):

This comparison table is the single most useful slide in this section for the Committee's actual decision-making process — it converts everything described across the previous sixteen slides into a scannable, side-by-side reference they can return to without re-reading the full route breakdowns. The closing line ("only the creative device differs") is an important reassurance: it confirms both routes are equally well-researched and equally grounded in the same brief, rather than implying Route 2 is a lesser or less considered option simply because it receives less depth in this deck.

SLIDE 125 — OUR RECOMMENDATION

On-slide text:

OUR RECOMMENDATION

We recommend Route 1 as the primary submission for its narrative depth and emotional resonance, with Route 2 retained as a ready alternate — should the Committee prefer a more direct, statement-led creative language.

Expanded rationale (notes):

Making an explicit recommendation here (rather than presenting both routes neutrally and

leaving the choice entirely open) is a deliberate confidence signal — it shows the agency has a clear point of view rather than simply generating options and deferring all judgement to the client. At the same time, naming the specific condition under which Route 2 might be preferred ("a more direct, statement-led creative language") respects that the Committee may have internal stakeholder preferences the agency isn't privy to, and gives them a legitimate, named reason to choose differently without it reading as a rejection of the agency's primary recommendation.

SLIDE 126 — SECTION CLOSING

On-slide text:

TWO ROUTES. ONE TRUTH.

Heritage is not behind India's future.
It is inside it.

Expanded rationale (notes):

This closing line is deliberately written to apply equally to both routes — "heritage is inside India's future, not behind it" works whether read against Route 1's continuous-transformation logic or Route 2's side-by-side pairing logic, making it a genuinely unifying close for the whole Clause 4.2.6 section (both routes combined) rather than a Route 2-specific sign-off. This also sets up a clean, quiet transition into Part 4 (Clause 4.2.7, Social Media Management and Analysis), which shifts the deck's register entirely from creative/campaign thinking into operational/analytical thinking — ending Part 3 on a calm, declarative note rather than another high-energy rhetorical flourish helps that tonal shift land more smoothly for the audience.

SLIDE 127–150 — Clause 4.2.7: Social Media Management and Analysis, In-Depth

This is the final scored section (10 marks: SWOT = 3, Action Plan/Strategy = 5, Metrics/Analytics = 2). I'll give full depth to each slide, tying language and structure directly back to the exact mark split in Annexure-II.

SLIDE 127 — PART 4 DIVIDER

On-slide text:

PART 4

SOCIAL MEDIA MANAGEMENT AND ANALYSIS

Clause 4.2.7

Expanded rationale (notes):

This is the final of the three scored clauses, so the divider should signal a tonal shift — from creative/campaign thinking (Part 3) into operational/analytical thinking. Recommend a visually distinct treatment here (perhaps a more data-led, less ornamental design language than the campaign dividers) to cue the Committee that the deck is moving into assessment-and-strategy mode rather than creative-showcase mode.

SLIDE 128 — SECTION INTRO

On-slide text:

WHY THIS SECTION MATTERS

A campaign is only as strong as the channels carrying it.

Before proposing where the Ministry's social media should go, we first assess where it stands today — honestly, platform by platform.

Expanded rationale (notes):

"Honestly" is a deliberate word choice here — it signals to the Committee upfront that the SWOT analysis that follows will not be a flattering, sanitised assessment designed merely to please the client, but a genuine diagnostic. This matters because Annexure-II scores the SWOT analysis as its own distinct line item (3 marks) — a Committee evaluating this criterion is specifically looking for evidence of real analytical capability, which requires naming actual weaknesses, not just strengths. Signalling honesty as a stated intention before the SWOT begins sets the right expectation.

SLIDE 129 — SWOT DIVIDER

On-slide text:

SWOT ANALYSIS

Ministry of Tribal Affairs — Current Social Media Presence

Expanded rationale (notes):

Naming "Ministry of Tribal Affairs" explicitly on this divider (rather than a generic "Social Media Audit") reinforces that what follows is a specific, researched assessment of the

Ministry's actual current accounts — not a generic template SWOT that could apply to any government department. This is important because Annexure-II's exact wording for this sub-criterion is "SWOT analysis of the Ministry of Tribal Affairs' current social media presence" — matching that phrasing closely on-slide shows direct responsiveness to the evaluation language.

SLIDE 130 — SWOT: INSTAGRAM

On-slide text:

INSTAGRAM

Strength: Strong visual storytelling potential and the platform best suited to younger, urban audiences.

Weakness: Limited storytelling depth in single posts; content often static and repetitive; minimal campaign-led narrative.

Opportunity: Reels on tribal stories, culture, and beneficiary journeys; carousel posts simplifying schemes; integration with ground-level content.

Threat: Low engagement reducing organic reach; short attention spans of users limiting visibility of official communication.

Expanded rationale (notes):

Note that this slide names a genuine weakness ("content often static and repetitive") rather than softening it into something purely positive — this is deliberate, since a SWOT that lists only strengths and opportunities while avoiding real weaknesses and threats would read as superficial to an evaluator looking specifically for analytical rigor. Recommend that before finalising this slide for actual submission, the team verify these specific claims against the Ministry's live Instagram account at time of presentation (post frequency, recent Reels usage, engagement rate) so the SWOT is grounded in current, checkable observation rather than generic platform assumptions that could be true of any government Instagram account.

SLIDE 131 — SWOT: FACEBOOK

On-slide text:

FACEBOOK

Strength: Strong reach in rural and older demographics; suitable for policy updates and announcements.

Weakness: Declining engagement among younger audiences; content often too formal and static; low engagement.

Opportunity: Regional storytelling in vernacular languages; community group engagement; regional and vernacular content expansion.

Threat: Rapid spread of misinformation in regional communities; declining organic reach over time.

Expanded rationale (notes):

The Facebook weakness and threat both centre on the platform's specific demographic skew (older, rural users, regional community groups) — this is an important distinction from the Instagram slide's weaknesses, which centre on younger urban users and attention span. Keeping each platform's SWOT genuinely tailored to its actual user base, rather than repeating the same generic weaknesses across all four platforms, is itself a marker of real analytical depth rather than templated filler.

SLIDE 132 — SWOT: X (TWITTER)

On-slide text:

X (FORMERLY TWITTER)

Strength: Real-time platform for official communication; credibility with verified authority.

Weakness: Weak trend adoption (reels, collaborations); no strong identity or content series; inconsistent posting frequency.

Opportunity: Threads to simplify policies and schemes; hashtag campaigns for amplification; positioning as a primary information source.

Threat: Misinterpretation of short-form communication; spread of unverified information.

Expanded rationale (notes):

"Misinterpretation of short-form communication" as a named threat is worth dwelling on, since it's specific to X's particular format constraints (character limits, fast-scrolling timeline context) rather than a generic social media risk — a short, decontextualised post about a sensitive scheme or community issue can be misread or quoted out of context more easily on this platform than on a longer-form platform like YouTube or Facebook. This threat connects directly forward to the crisis communication framework that appears later in this

section (slide 143), giving the deck internal consistency between diagnosis and response plan.

SLIDE 133 — SWOT: YOUTUBE

On-slide text:

YOUTUBE

Strength: Established official presence with credibility for long-form official communication.

Weakness: Very low upload frequency; poor utilization of Shorts; lack of structured storytelling; weak discoverability and SEO optimization.

Opportunity: Shorts for quick awareness and reach; explainer videos for schemes and benefits; cross-promotion from other platforms.

Threat: Low discoverability without optimization; low content frequency reducing platform relevance over time.

Expanded rationale (notes):

YouTube's weakness list is notably the longest of the four platforms (four distinct weaknesses named, versus three for the others) — this is intentional, since YouTube as a platform genuinely has more dimensions on which a government channel typically underperforms (upload frequency, Shorts adoption, structured series planning, and SEO/discoverability are all separate, distinct failure points, not restatements of the same issue). Naming all four separately, rather than collapsing them into a single vague "underused" statement, demonstrates a more granular understanding of what YouTube specifically requires to perform well.

SLIDE 134 — SWOT: CROSS-PLATFORM SUMMARY

On-slide text:

WHAT THIS SWOT TELLS US

Across all four platforms, the same pattern repeats: strong institutional credibility, but inconsistent frequency, limited storytelling depth, and underused native formats (Reels, Shorts, Threads).

The opportunity is not new platforms — it is using existing platforms the way their algorithms and audiences actually expect.

Expanded rationale (notes):

This synthesis slide is important because it converts four separate platform-by-platform diagnoses into a single, memorable strategic insight — exactly the kind of move that distinguishes a genuine analysis from a list of disconnected observations. "The opportunity is not new platforms" is a deliberately decisive recommendation, pre-empting an obvious but often wrong instinct (suggesting the Ministry expand onto newer platforms like Threads, LinkedIn, or a dedicated app) in favour of the more credible, resource-efficient recommendation: get more value from the four channels already established and already carrying institutional credibility.

SLIDE 135 — ACTION PLAN DIVIDER

On-slide text:

ACTION PLAN / STRATEGY

To Enhance the Ministry's Social Media Presence

Expanded rationale (notes):

This divider's wording ("Action plan / strategy proposed for MoTA to enhance its social media presence") is taken almost verbatim from Annexure-II's own language for this sub-criterion (5 marks, the largest single weighting within Clause 4.2.7) — matching the Committee's exact phrasing on the section divider itself makes clear precisely where in the presentation this specific, heavily weighted criterion is being addressed.

SLIDE 136 — STRATEGIC FRAMEWORK

On-slide text:

THE STRATEGIC FRAMEWORK

"Connect. Empower. Showcase."

Connect — simplify access to information for every audience segment.

Empower — strengthen community outreach and two-way engagement.

Showcase — highlight transformation and impact through real stories.

Expanded rationale (notes):

This three-word framework gives the Committee a simple mnemonic device to hold onto across the next several platform-specific action plan slides — each individual platform recommendation that follows (Instagram, Facebook, X, YouTube) can be mentally sorted into one or more of these three buckets, making the section feel organised around a coherent strategy rather than a disconnected list of platform-by-platform tips. Recommend this framework be visually reinforced (e.g. as a recurring header or colour-coded tag) on each subsequent platform action-plan slide, so the Committee can trace which of the three strategic goals each specific recommendation serves.

SLIDE 137 — ACTION PLAN: INSTAGRAM**On-slide text:**

INSTAGRAM ACTION PLAN

Reels and short videos showcasing beneficiary stories and field impact.

Human-centric visual storytelling to make schemes relatable.

Thematic campaign content built around key initiatives.

Before-after transformation stories told through real people, not graphics alone.

Expanded rationale (notes):

Each of these four recommendations directly answers a specific weakness named in the Instagram SWOT slide (130): "limited storytelling depth in single posts" is answered by "thematic campaign content"; "content often static and repetitive" is answered by "Reels and short videos" and "before-after... told through real people." Recommend the live presentation explicitly draw this connecting line for the Committee (e.g. "you'll notice each of these four recommendations maps directly back to a weakness we named two slides ago") since it's a subtle structural strength of the deck that might otherwise go unnoticed if left implicit.

SLIDE 138 — ACTION PLAN: FACEBOOK**On-slide text:**

FACEBOOK ACTION PLAN

Positioned as the primary platform for beneficiary communication and community trust-building.

Multilingual, region-specific posts for deeper penetration.

Shareable explainers on scheme eligibility and application processes.

On-ground amplification of camps and outreach drives.

Expanded rationale (notes):

"Positioned as the primary platform for beneficiary communication" is a deliberate strategic choice worth justifying explicitly: Facebook's SWOT strength (slide 131) named its reach in rural and older demographics — these are precisely the demographics most likely to be direct or prospective beneficiaries of MoTA schemes (EMRS families, Van Dhan participants, PM JANMAN target communities), making Facebook the most logical primary channel for beneficiary-facing communication, while Instagram (younger, urban-skewed) is better suited to the broader national pride/awareness narrative carried by the Clause 4.2.6 campaign.

SLIDE 139 — ACTION PLAN: X (TWITTER)

On-slide text:

X (TWITTER) ACTION PLAN

Real-time updates on announcements and key developments.

Thread explainers simplifying schemes and policy.

Quick, factual responses to misinformation.

Active engagement with journalists and opinion leaders through crisp, authoritative messaging.

Expanded rationale (notes):

"Active engagement with journalists and opinion leaders" positions X specifically as the Ministry's media-relations-facing channel, distinct from Facebook's beneficiary-facing role and Instagram's public-pride-facing role — this kind of explicit role differentiation across platforms (rather than treating all four as interchangeable places to post the same content) is itself evidence of strategic thinking that should score well against the "action plan/strategy" criterion specifically, since a genuine strategy assigns distinct jobs to distinct channels rather than spreading identical content everywhere.

SLIDE 140 — ACTION PLAN: YOUTUBE

On-slide text:

YOUTUBE ACTION PLAN

Long-form impact stories and beneficiary journeys.

Detailed explainer videos breaking down scheme implementation.

Shorts for quick awareness and improved discoverability.

A structured, recurring series format for continuity rather than one-off uploads.

Expanded rationale (notes):

"A structured, recurring series format" directly answers the YouTube SWOT weakness named at slide 133 ("lack of structured storytelling"). Recommend this slide specifically reference a concrete series concept by name (something analogous to the old deck's "THE EMRS GENERATION" or "WHAT INDIA OWES THEM" documentary series device) rather than staying purely abstract — naming an actual recurring series format here would give the Committee something specific and memorable to evaluate, consistent with how the rest of the deck favours named, concrete devices over generic descriptions.

SLIDE 141 — ACTION PLAN: CONTENT CALENDAR APPROACH

On-slide text:

BUILDING A CONSISTENT CONTENT CALENDAR

A pre-planned monthly calendar mapping content type to platform and to moments that matter — scheme milestones, Janjatiya Gaurav Divas, International Day of Indigenous Peoples — replacing ad hoc posting with a planned rhythm.

Expanded rationale (notes):

This slide directly addresses one of the single most consistent weaknesses named across all four platform SWOTs: inconsistent posting frequency (named explicitly for Facebook, X, and YouTube, and implicitly present in Instagram's "repetitive" content critique). Rather than repeating "post more consistently" four separate times across the platform-specific slides, this single cross-cutting slide names the actual mechanism (a planned monthly calendar tied to real dates and moments) that would solve the consistency problem across all platforms simultaneously — a more efficient and more credible answer than repeating the same fix four times.

SLIDE 142 — ACTION PLAN: VERNACULAR REACH

On-slide text:

VERNACULAR AND REGIONAL EXTENSION

Content adapted — not just translated — for priority tribal-belt states and languages, ensuring the Ministry's digital voice reaches communities in their own language and cultural context, not only in Hindi and English.

Expanded rationale (notes):

"Adapted — not just translated" is a precise and important distinction, directly echoing language used in the earlier strategic framing of Part 1 (and in the old deck's vernacular channel section, which made the same distinction explicitly: "translated and culturally adapted — not just linguistically translated"). Recommend naming at least a few specific priority states and languages here if space allows (e.g. Jharkhand, Odisha, Chhattisgarh; Santali, Gondi, Bodo), since specific, named examples are consistently more persuasive throughout this deck than abstract claims about "vernacular reach" in general.

SLIDE 143 — ACTION PLAN: CRISIS COMMUNICATION

On-slide text:

CRISIS COMMUNICATION — RAPID RESPONSE FRAMEWORK

Potential crises:

- Misinformation around tribal schemes, eligibility, or benefits.
- Delays or implementation gaps causing public concern.
- Negative narratives amplified by media or activist groups.

Response framework:

- Pre-drafted clarification templates for fast deployment.
- Target under 15-minute acknowledgment of issues online to build trust.
- Standardized hashtags (e.g. #TribalUpdates, #MoTAFacts) for real-time updates and reassurance.

Expanded rationale (notes):

This slide is one of the most operationally concrete in the entire deck, and deliberately so — crisis communication readiness is a genuine differentiator for a government retainership pitch, since it demonstrates the agency has thought beyond routine content production into risk management. The specific 15-minute acknowledgment target gives the Committee a measurable, checkable service-level commitment rather than a vague promise of "fast response," and connects directly back to the X (Twitter) SWOT threat named at slide 132

("misinterpretation of short-form communication... spread of unverified information") — showing the deck's diagnosis and response sections are genuinely linked, not written independently of each other.

SLIDE 144 — ACTION PLAN: GOVERNANCE

On-slide text:

CONTENT APPROVAL AND GOVERNANCE

A simple, fast-moving approval chain: content creation, internal review for accuracy and tone, Ministry nodal officer sign-off, then publication — with a shorter turnaround window for time-sensitive content and any crisis-related response escalated for sign-off before posting.

Expanded rationale (notes):

This slide answers an implicit but important concern for any government client evaluating a PR/social media vendor: how much editorial control does the Ministry retain over what's published in its name? Explicitly stating that all content passes through Ministry nodal officer sign-off before publication — including, and especially, crisis-related responses — reassures the Committee that creative ambition (as shown extensively in Part 3) doesn't come at the cost of institutional control, which is a real and legitimate concern a government evaluation panel would be right to probe.

SLIDE 145 — ACTION PLAN SUMMARY

On-slide text:

ACTION PLAN: SUMMARY

Four platforms, four distinct roles, one consistent voice — Instagram for visual storytelling, Facebook for community trust, X for real-time authority, YouTube for depth and explanation.

Connected by a shared content calendar, vernacular extension, and a fast crisis-response framework.

Expanded rationale (notes):

This summary slide closes the Action Plan/Strategy sub-section (5 of the 10 marks for this clause, the single largest weighting) by restating the role differentiation established across slides 137–140 in one compact line, then naming the three cross-cutting systems (calendar, vernacular, crisis response) that tie the four platform-specific plans together into one

coherent strategy rather than four separate plans. This mirrors the structural device used to close Clause 4.2.6's deliverables section (slide 96's recap table) — giving the Committee a clean checkpoint before the deck moves into the final, metrics-focused sub-section.

SLIDE 146 — METRICS DIVIDER

On-slide text:

SOCIAL MEDIA TRACKING METRICS, ANALYTICS, AND RELEVANCE

For the Ministry of Tribal Affairs

Expanded rationale (notes):

This divider's wording is again deliberately close to Annexure-II's exact phrasing for this final sub-criterion ("Social media tracking metrics/ analytics and its relevance and usage for the MoTA" — 2 marks). Though this is the smallest mark allocation within Clause 4.2.7, it should not be treated as an afterthought — recommend giving it genuine substance across the following slides rather than a single rushed slide, since even small mark allocations benefit from being addressed with the same rigor as larger ones, both for scoring purposes and for demonstrating overall thoroughness.

SLIDE 147 — METRICS FRAMEWORK

On-slide text:

THE METRICS FRAMEWORK

Reach and engagement (impressions, shares, saves, video views) — measures visibility.

Sentiment analysis (positive/negative/neutral mentions, top keywords, emotional tone) — measures perception.

Response and crisis metrics (response time to public queries, crisis containment effectiveness) — measures responsiveness.

Expanded rationale (notes):

Organising metrics into three distinct categories — each explicitly paired with what it actually measures (visibility / perception / responsiveness) — gives the Committee a clear mental model for why each metric matters, rather than simply listing metric names without context. This structure also deliberately ties back to the crisis communication framework introduced at slide 143: "crisis containment effectiveness" as a tracked metric closes the

loop, showing that the crisis response commitments made earlier (15-minute acknowledgment target) are themselves measurable and reportable, not just a one-time promise.

SLIDE 148 — MONITORING TOOLS AND COVERAGE

On-slide text:

WHAT WE TRACK AND HOW

Using monitoring platforms (e.g. Meltwater-class tools) to track: mentions trend over time, top positive and negative keywords, sentiment by location and demographic, top hashtags, and media coverage across print, digital, and electronic news.

Expanded rationale (notes):

Naming an actual class of monitoring tool (Meltwater or equivalent) rather than describing tracking only in abstract terms ("we will monitor sentiment") gives this claim real substance — it signals the agency already has access to, and experience with, professional-grade social listening infrastructure, rather than proposing to track metrics manually or through free/basic tools. Including media coverage across print, digital, and electronic news (not just social platforms) also reflects that "social media tracking" for a government client legitimately extends into broader earned media monitoring, since online sentiment and traditional press coverage often influence each other directly.

SLIDE 149 — WHY THESE METRICS MATTER FOR MOTA

On-slide text:

WHY THIS MATTERS SPECIFICALLY FOR THE MINISTRY

For a Ministry communicating sensitive, community-specific subject matter, sentiment and response-time metrics matter as much as reach — a high-reach post that mishandles a community narrative does more harm than a smaller, well-received one.

Metrics are reported monthly, with clear recommendations for the following month, not just raw numbers.

Expanded rationale (notes):

"A high-reach post that mishandles a community narrative does more harm than a smaller, well-received one" is an important, slightly counter-intuitive point worth making explicit — many social media pitches default to treating reach/impressions as the primary success

metric, but for a Ministry handling sensitive community representation (per the child-safety-adjacent sensitivities and dignity concerns raised throughout this campaign's tone guidelines), getting the narrative right matters more than maximising raw numbers. "Recommendations for the following month, not just raw numbers" is a direct callback to a strong device from your old deck's reporting commitments, signalling that monthly reports will be genuinely actionable rather than purely descriptive data dumps.

SLIDE 150 — SECTION & DECK CLOSING

On-slide text:

ONE MINISTRY. ONE NARRATIVE. EVERY PLATFORM ALIGNED.

Heritage that earns pride. Opportunity that earns access. Contribution that earns recognition. Leadership that earns the future — consistently communicated, accurately measured, and ready for Viksit Bharat 2047.

Expanded rationale (notes):

This is the single closing line for the entire 150-slide deck, deliberately resolving all three scored clauses at once: "consistently communicated" answers back to Clause 4.2.7 (this section), "accurately measured" answers back to the metrics sub-section just completed, and the four-pillar restatement ("Heritage... Opportunity... Contribution... Leadership...") closes the loop all the way back to slide 19's Part 1 closing line, giving the entire presentation a single, unified rhetorical bookend rather than ending on a note specific only to social media. Recommend this be the final slide of the live presentation as well — a clean, confident, full-deck closing statement rather than trailing off after the metrics discussion.
